TECHNICAL NOTES

USDA-Natural Resources Conservation Service
Boise, Idaho

TN BIOLOGY NO. 27 August, 1999

"Birds in a Sagebrush Sea – Managing Sagebrush Habitats for Bird Communities" gives a good overview of sagebrush habitat in the west, including Idaho. The focus of the book is to help managers and decisionmakers understand the habitat needs of birds associated with sagebrush communities. The information should be helpful when developing conservation plans with landowners on rangeland.

File this in the Biology section of the Technical Notes, Section VI of the Technical Guide.
