Land Use Applicability

Benefits
This bundle of enhancements is focused on activities to improve wildlife habitat on rangelands through management strategies that promote healthy forage and rest periods; re-establish and/or renovate prairie plant communities; and restore rare and declining habitats that may occur on rangeland. Implementing these activities together creates a synergy that should result in more conservation benefits than might be expected from the individual activities. Applicants that choose to implement this bundle of activities will receive an increase in ranking and payment points.

Rules for Enhancement Activity Bundles

- All of the activities in the bundle must be implemented. However, if an applicant has already implemented 1 or 2 of the activities, they are still eligible for the bundle and only need to implement the remaining 3 or 4 activities.
- Applicants will be required to install all enhancements in the bundle wherever they are needed on the applied area.
- Other enhancements cannot be substituted for those in the bundles.
- Applicants can choose how many acres of their operation they want to implement the bundle on. However, if the applicant chooses to implement the activity on only a portion of their operation their ranking points and payment points will be reduced.

Criteria

Follow the criteria in the respective enhancement activity sheets to implement each enhancement.

For this bundle implement ANM09, ANM11, ANM21 and PLT02 according to their respective criteria on all of the area selected for bundle application. Implement ANM22 on the target areas of rare or declining habitat as identified by NRCS at the state level.

Documentation Requirements

Follow the documentation requirements in the respective enhancement activity sheets to document the implementation of each enhancement.
