INSTRUCTIONS FOR ROOF GUTTER AND DOWNSPOUT

1. This drawing is to be used in conjunction with NRCS Ohio Practice Standard 558 "Roof Runoff Structure" and the companion design spreadsheet. The current versions of both of these items can be found on the NRCS Ohio e-FOTG site and the NRCS Ohio web site in the Engineering section.

2. This drawing is a fill-in-the-blank type drawing. Ensure that all information is provided,

3. This drawing only pertains to the gutter and downspout system above the ground line. If the downspouts are to connect to an underground tile, a separate drawing will need to be done to show the underground outlet details.

4. Make sure that the construction specification from PS-558 "Roof Runoff Structure" is attached.
