This soil survey was compiled by the U.S. Department of Agriculture, Natural Resources Conservation Service. Base maps are orthophotographs prepared by the U.S. Department of Interior, Geological Survey, from 1992-1993 aerial photography. The hydrography layer was created by the field soil scientist based on field observations and the orthophoto image. The public land survey system (PLSS) information was acquired from the Wisconsin Department of Natural Resources. The roads were acquired from the Menominee Tribal Enterprises and the other cultural features were acquired from the U.S. Geological Survey. The cultural layers were edited to conform with features represented on the publication orthophotography and to enhance the clarity of the soils information.

North American Datum of 1983 (NAD83). GRS-80 Spheroid 1000-meter ticks: Universal Transverse Mercator, zone 16. Coordinate grid ticks and land division data, if shown, are approximately positioned. Digital data are available for this quadrangle.
