To whom it may concern.

The South Dakota Izaak Walton League at Convention voted to follow the lead of the National IWLA and comment on the Conservation Security Program

The IWLA supports strong federal conservation policies on private agricultural lands. We view CSP as a great new addition to farm policy. This conservation policy provides producers and others with environmentally healthy lands for now and the future. This new systems approach correctly emphasizes management practices.

The SD Division sees the current Interim Final Rule resulting in poor availability to most farmers. It provides little incentive when compared to current subsidizing of unneeded production. It does not encourage many interested producers to develop full conservation practices.

The SD Division would like to see a revision of the payment structure to offer real financial incentives.  
The SD Division would like to see a revision that address conservation needs in diverse land ecologies.  
The SD Division would support a continuous signup for CSP.  
The SD Division would support the removal of 50 percent cost-share cap.  
The SD Division would support increase payments for beginning operators.

Thank you for the opportunity to comment.

Respectfully Submitted
