Reference to Seeding- Docket # NRCS-IFR- 08005

To whom it may concern:

Upon hearing of a few changes in the Farm Bill, we the Littlefield-Hurricane Valley NRCD, located in the northwest corner of Arizona, have some concerns.

The stipulations on seeding is that only native species can be used, We have discussed this at our Littlefield-Hurricane Valley NRCD meeting and we feel that we need to comment. We feel that a person seeding his land should be able to seed other things not just the native species. We feel that other species such as the Russian Wild Rye, Crested Wheat, Beardless wheat grass, foliage Cochia are other species that will grow in our area. We the Littlefield-Hurricane Valley NRCD would like to have this changed if at all possible.

Sincerely yours,

Littlefield-Hurricane Valley NRCD
Ethan Bundy-Vice- Chairman
