

Watershed Rehabilitation

April 2009

Reinvesting in Upper Clear Boggy Watershed Dam No. 33, Oklahoma

Introduction

This dam rehabilitation project will create 29 jobs during the construction period and will provide flood protection for agricultural land, five houses and two county roads downstream from the dam that would be adversely affected by a dam failure.

The Upper Clear Boggy Watershed Dam is located five miles southwest of Ada, in Pontotoc County.

Funded through the American Recovery and Reinvestment Act (ARRA) of 2009, this project is part of the Obama Administration's plans to modernize the nation's infrastructure, jump-start the economy, and create jobs. NRCS is using Recovery Act dollars to update aging flood control structures, protect and maintain water supplies, improve water quality, reduce soil erosion, enhance fish and wildlife habitat, and restore wetlands. NRCS acquires easements and restores floodplains to safeguard lives and property in areas along streams and rivers that have experienced flooding.

Project Description

- **Location:** Pontotoc County, 4th Congressional District
- **Federal Funding:** \$1,010,000
- **Sponsor Funding:** \$403,850

The dam is now classified as high-hazard since there are houses and county roads downstream. There is a potential for loss of life if the dam should fail. The dam must be brought up to current safety standards. The dam's height will be raised one foot and the existing spillway will be replaced. The reservoir will be raised 3.6 feet to result in an 18-acre lake.

Partners

- USDA, Natural Resources Conservation Service
- Pontotoc County Conservation District
- Oklahoma Conservation Commission

Benefits

Rehabilitation of the dam will reduce the potential for loss of life and provide \$5.2 million in flood-reduction benefits over the dam's 100-year life. It will benefit 175 floodplain acres.

Economic Opportunities

The construction of the project will provide jobs for heavy equipment operators, job managers, and other construction personnel and subcontractors. Local businesses such as motels, restaurants and fuel suppliers will also benefit.

Statewide Perspective

Upper Clear Boggy Watershed Dam No. 33, one of 49 dams in the 113,482-acre watershed, is part of a vital network of 2,105 dams in 121 NRCS-assisted watershed projects in Oklahoma. These dams make up a \$2 billion infrastructure and provide \$75 million in average annual benefits.
