<u>Air Quality Impacts</u> Emissions of Particulate Matter (PM) and PM Precursors	4	Various filtration and scrubbing systems are highly effective at mitigating particulate matter emissions.
Emissions of Ozone Precursors	2	Some filtration and scrubbing systems can be highly effective at mitigating emissions of volatile organic compounds (VOCs).
Emissions of Greenhouse Gases (GHGs)	2	Some filtration and scrubbing systems can be highly effective at mitigating emissions of methane. However, some biofilters may also increase emissions of nitrous oxide (N2O).
Objectionable Odors	4	Some filtration and scrubbing systems can be highly effective at mitigating emissions of volatile organic compounds (VOCs), odorous sulfur compounds, and ammonia.
