

## 2003 and 2004 Projects

Delta Wildlife has begun to secure cooperator agreements and to identify project sites for 2003; however, more cooperators and project sites are needed. If you are a landowner or farmer in the Project Area and are interested in participating in the project or learning more about the project, please contact Trey Cooke or Gayden Pollan at the Delta Wildlife office (662) 686-3370.

Signs were installed on selected sites for tours. Blue bird boxes were also installed in areas where Blue birds were found during summer bird counts.

2002 avian and vegetative data was collected by summer research technicians (l to r) Kara Davis, University of Michigan; Echo Rexwood, Utah State University; Ross Conovor, Mississippi State University; Matt Hass, University of Minnesota; Lindsey Smith, Mississippi State University. Technicians were under the supervision of Dr. Wes Burger and Dr. Eric Linder of Mississippi State University.
