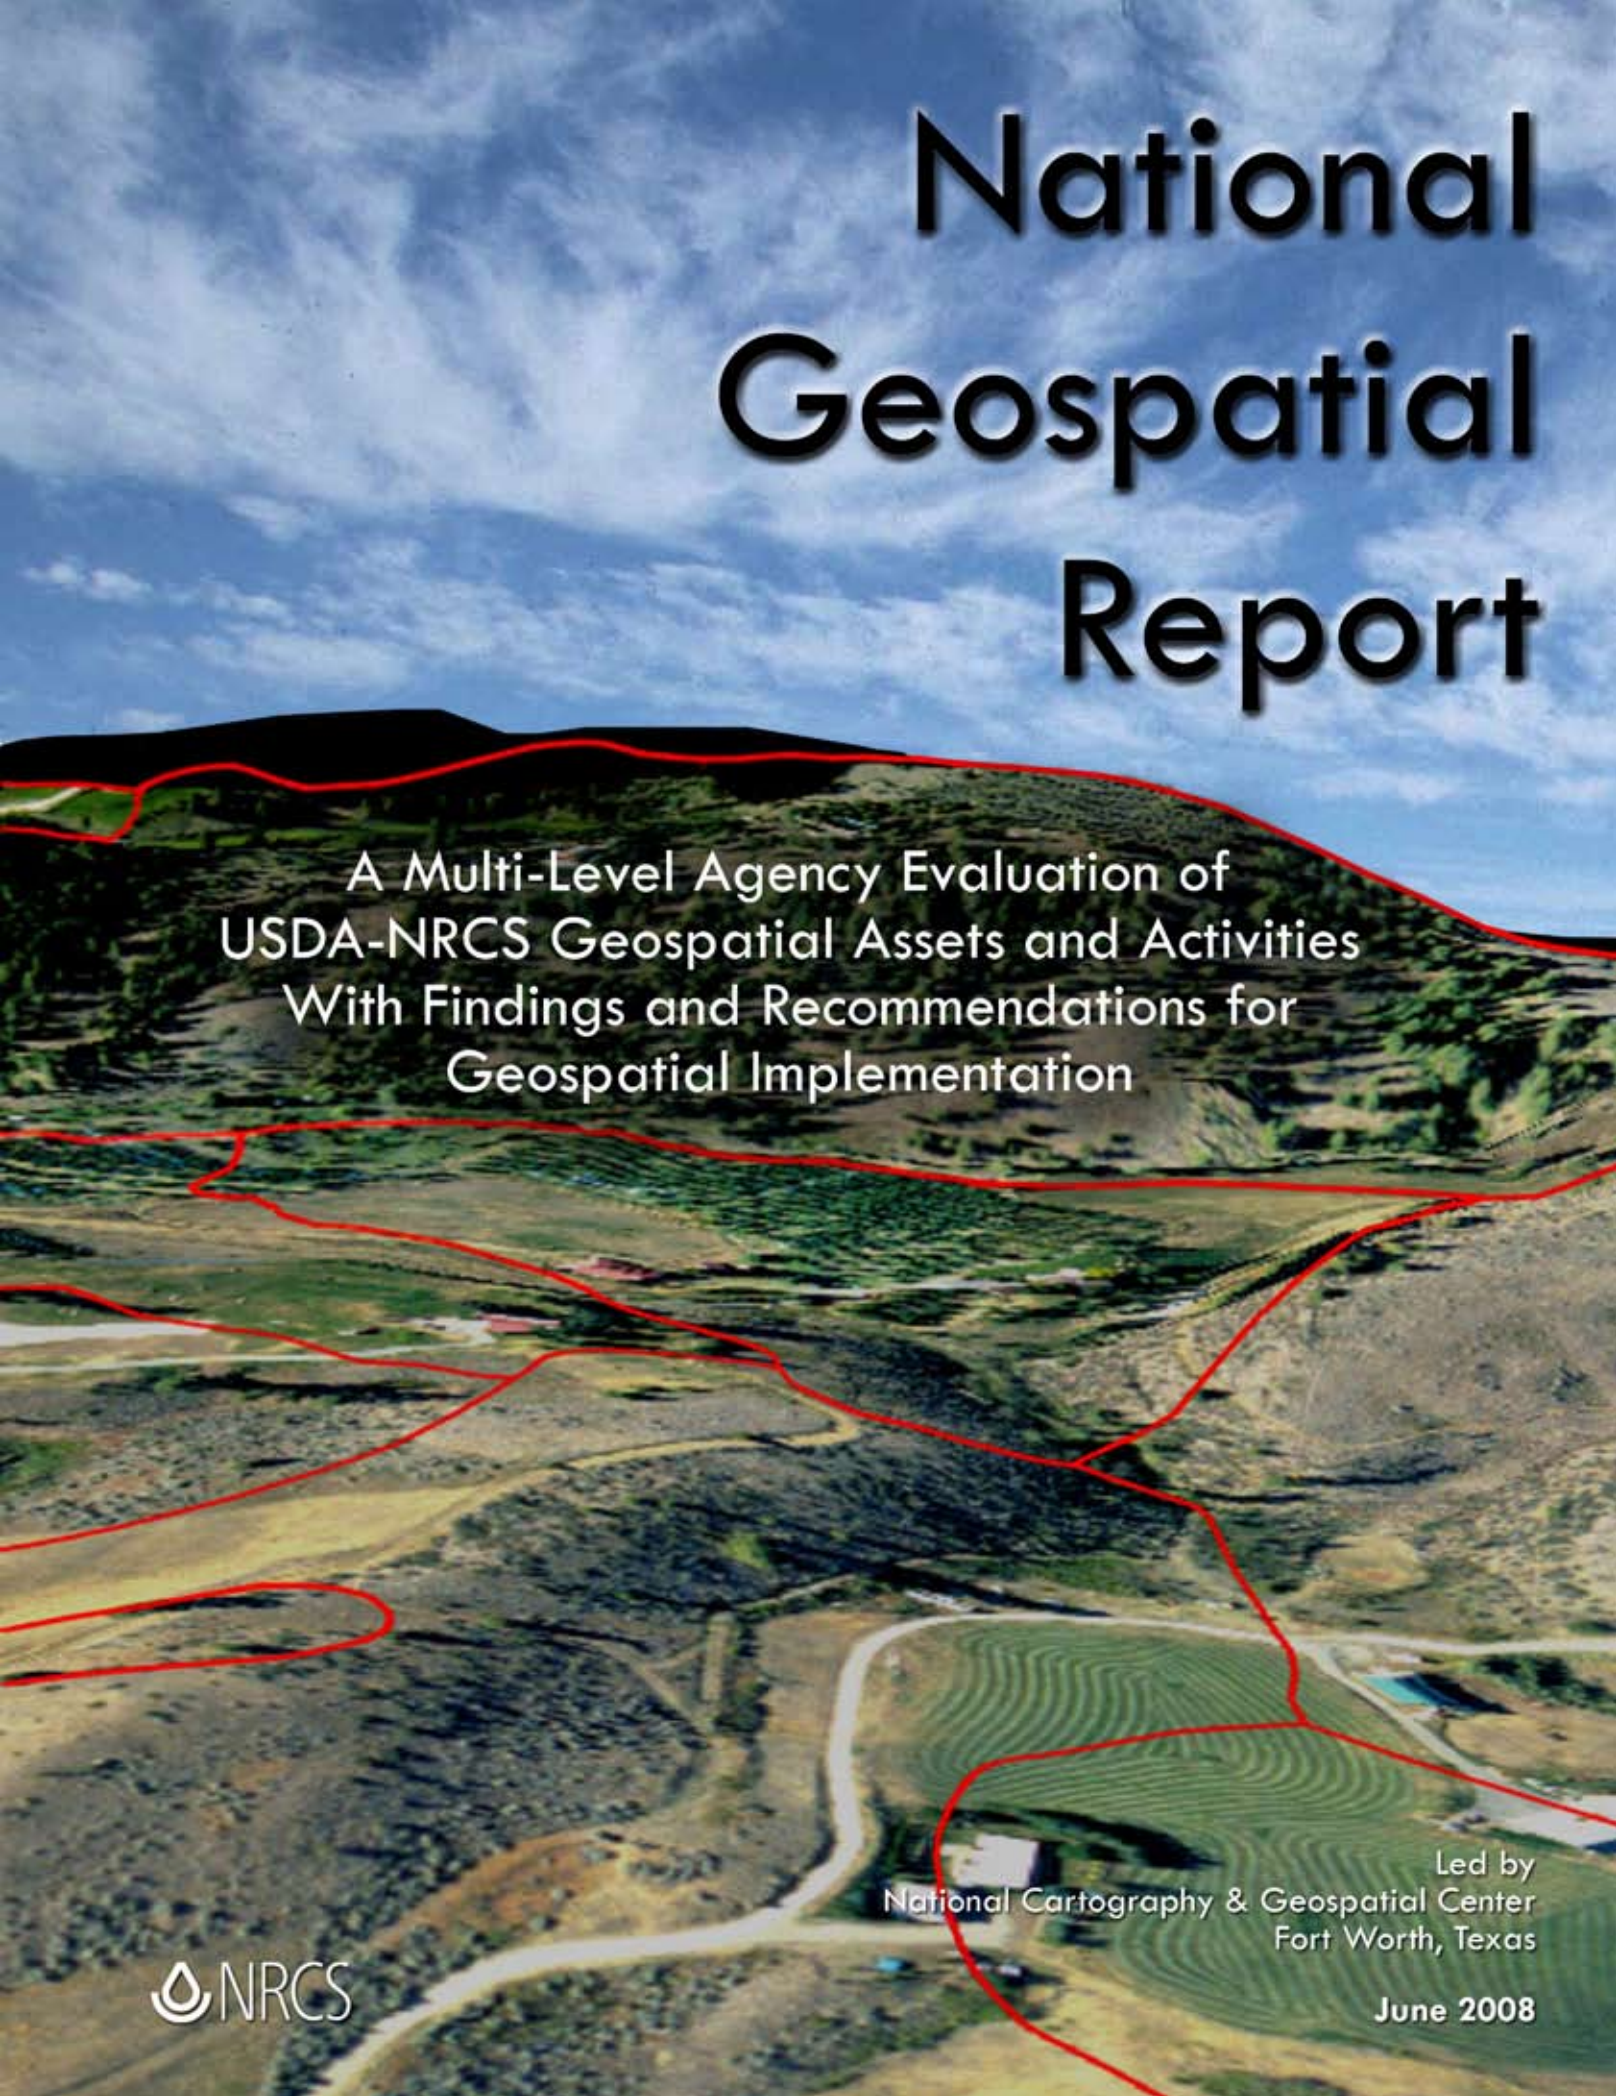
National Geospatial Report

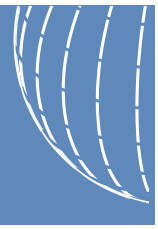
A Multi-Level Agency Evaluation of
USDA-NRCS Geospatial Assets and Activities
With Findings and Recommendations for
Geospatial Implementation



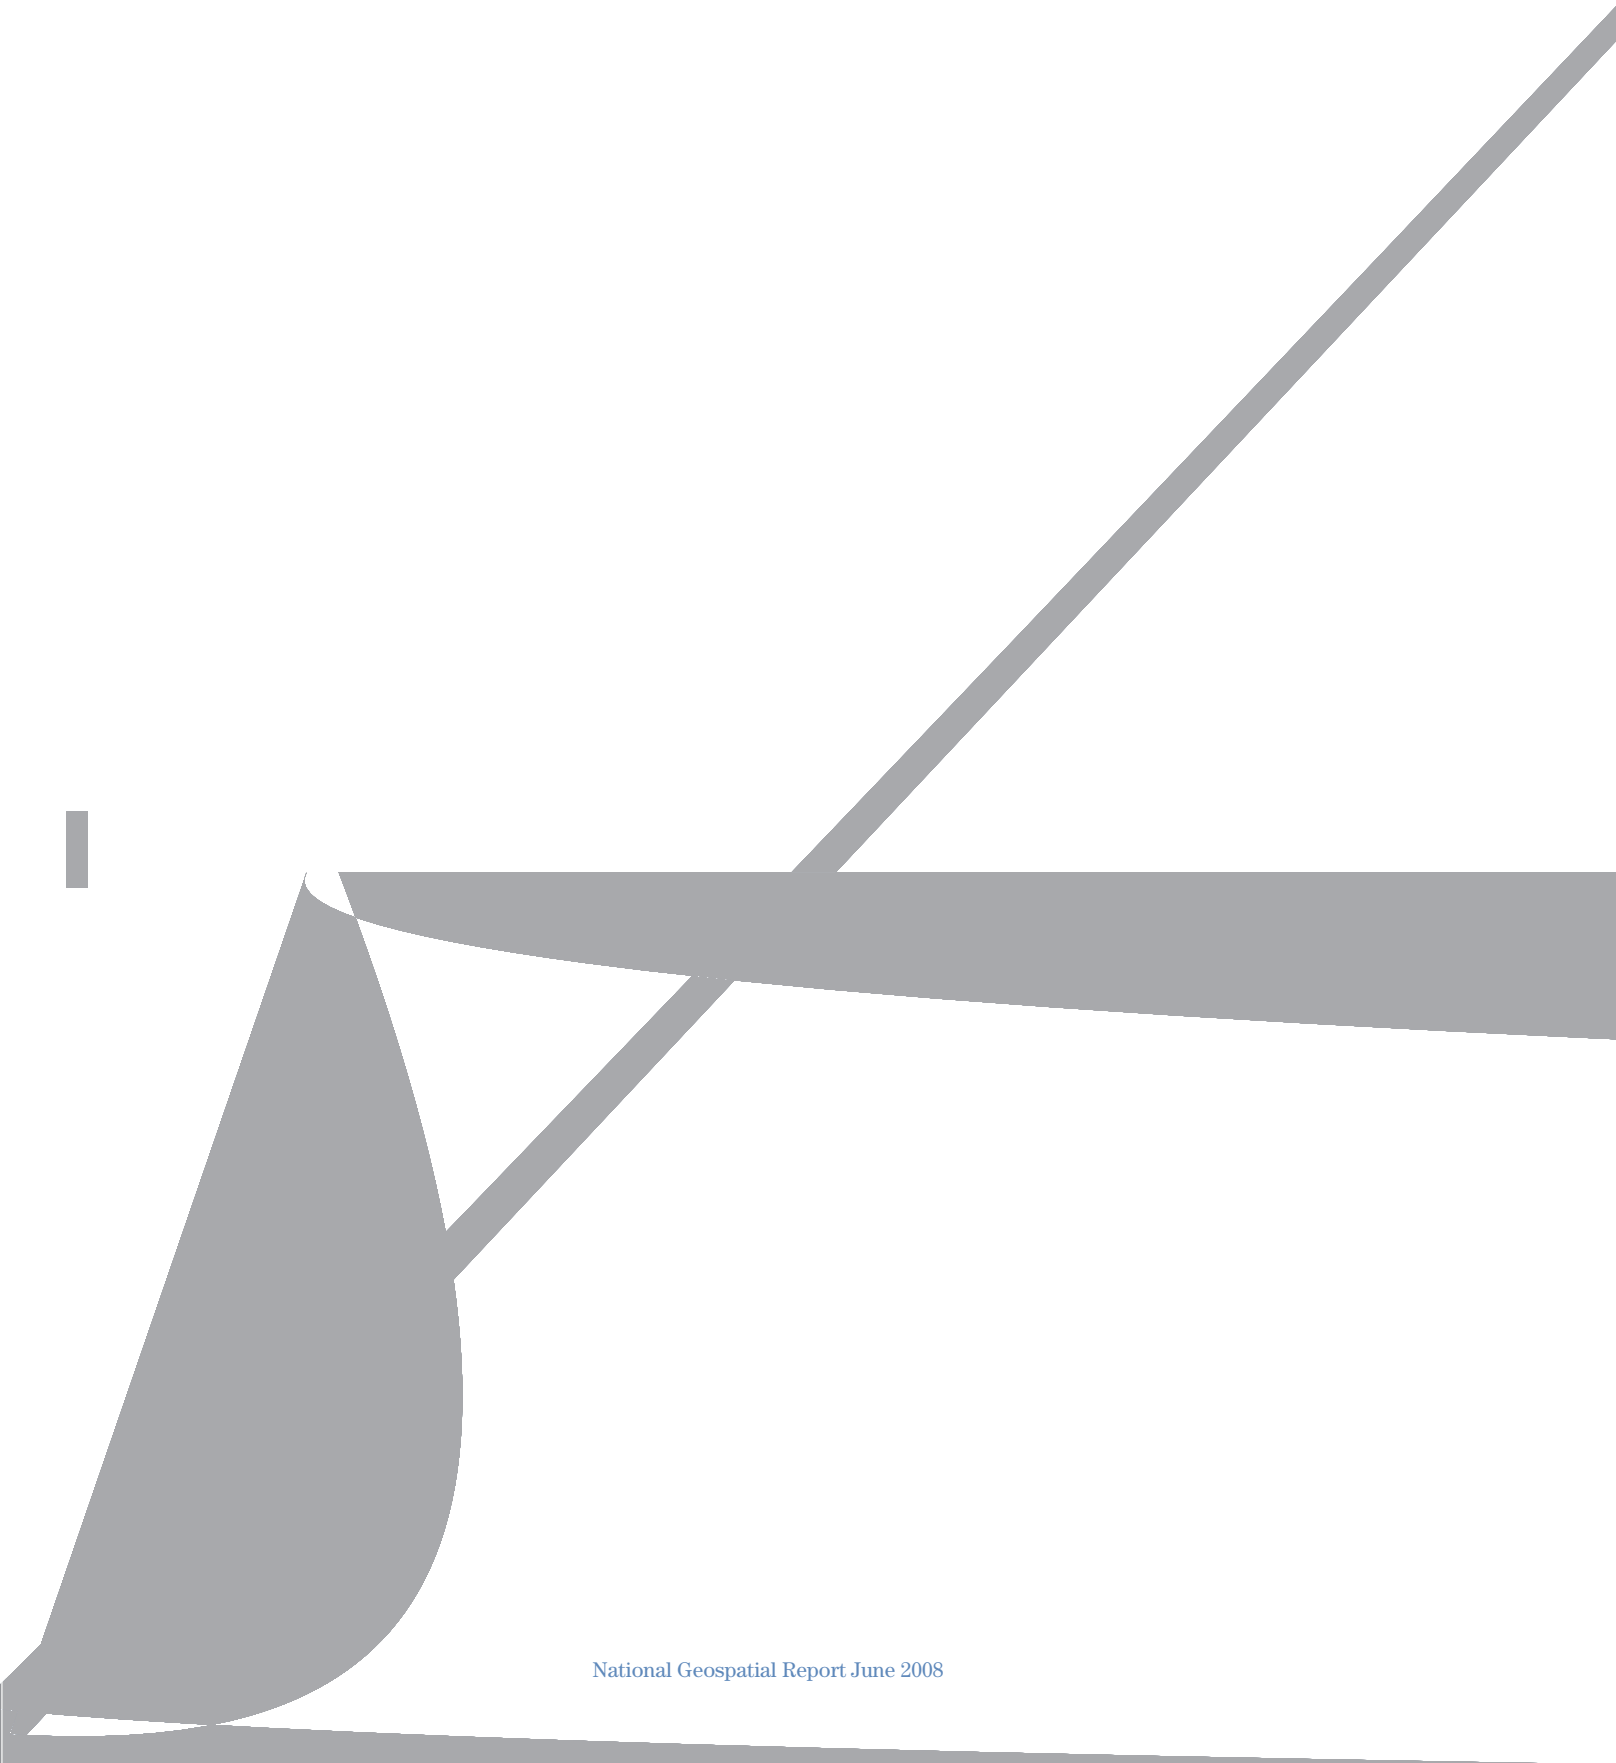
Led by
National Cartography & Geospatial Center
Fort Worth, Texas

NRCS

June 2008



National Cartography and Geospatial Center



The National Geospatial Report is a comprehensive Agency evaluation of geospatial assets and activities. It outlines how the NRCS works internally and externally through processes to deliver geospatial data, technology, and services. It describes the level of coordination and collaboration needed to manage geospatial assets critical to achieving the NRCS mission.
