

Many group volunteer opportunities are available. Members of service clubs, corporations, faith-based organizations and personal friends working together can assist with a wide variety of important conservation projects.

Earth Team volunteers and a biologist take a break from field counting the endangered Sage Grouse.

NRCS volunteers plant trees and shrubs into a riparian buffer to help filter and clean water going into a nearby stream.

Earth Team volunteers plant native grasses to reduce beach erosion and improve wildlife habitat along an environmentally sensitive shoreline.

Groups

NRCS volunteers plant 250 species of native trees and shrubs into a 2,000 square foot demonstration garden.

A youth group installs sand fencing to reduce beach erosion.

Boy Scout/Earth Team volunteers pause after planting trees to improve wildlife habitat and the environment.
