

Eligible Practice List

Contract holders certifying as a limited resource and beginning farmers or ranchers, and socially disadvantaged are eligible for a payment schedule which is 25 percent higher than typical financial assistance.

Existing and relocated animal feeding operations are eligible for up to \$175,000 of financial assistance to implement practices required for the proper design, implementation, and management of the animal waste system. New animal feeding operations are eligible for up to \$100,000. Contract holders certifying as a limited resource and beginning farmers or ranchers, and socially disadvantaged are eligible for up to \$220,000 for existing and \$125,000 for new ag waste systems.

The payment limitation includes payments for structural and management incentive practices. The payment limitation does not include Practice Code 100 – CNMP.

Practices associated with irrigation conversions, including structural and management, will be limited to \$85,000 per operating unit. Contract holders certifying as a limited resource and beginning farmers or ranchers, and socially disadvantaged are eligible for up to \$107,000.

If local resource concerns merit the implementation of a conservation practice not considered a State eligible practice, the Local Work Group (LWG) may submit a request to the State Conservationist. Requests must justify how the practice will benefit National, State, and local resource concerns. Requests shall include payment method and recommend proposed costs.
