

SUBPART C – APPLICATION FOR ASSISTANCE

ME512.23 Submitting Applications

(c) Starting Practices Included in the CPC

Requests for waivers will be submitted using the Conservation Program Request for Waiver form. See Exhibit – Subpart J – 512.90 (Maine-1) for form.

Prior to submitting the waiver request, the District Conservationist must certify on the form that the practices for which the waiver is being requested are included in a conservation plan and that all pertinent reviews (e.g. Cultural Resources, Threatened or Endangered Species, Protected Habitat, etc.) have been completed.

(e) Renewing Waiver Requests

An approved waiver request may be renewed if the practice installation has not yet started, the application remains eligible, and the application is deferred to the next fiscal year. To renew, the waiver request must be re-submitted using the current request form.

An approved waiver may **not** be renewed if installation has started on the practice for which the waiver was granted, but no contract was awarded within the previous waiver period. Furthermore, **no reimbursement** will be paid for the installed practice.
