

NJ541.3 Title Blocks

E. File Name: This space is reserved for a cross reference to the electronic computer aided design (CAD) file from which the drawing sheet is produced. File names are optional.

F. Drawing Name: This space is reserved for the project number. A project number will be assigned to all jobs that require the approval of the State Conservation Engineer, for all inventory size dams, all Class VI or higher jobs, and jobs done under the Watershed, EWP, or RC&D programs. The State Conservation Engineer will assign the numbers and will maintain a drawing register. It is the designer's responsibility to obtain a drawing number. A copy of the original drawing set for all projects in the register will be maintained in the State Office Engineering Section. The following numbering system will be used:

(1) Conservation Operations and Farm Bill programs: The prefix NJ will be followed by a three or four digit identification number assigned chronologically. Example: NJ-600.

(2) Watershed Planning: The prefix NJ will be followed by the financial project code, an application number, and a site number. Site numbers will be assigned to all structural measures in a plan. Example: NJ-06-15-2

(3) Watershed Operations, Watershed Rehabilitation, EWP, and RC&D: The prefix NJ will be followed by the financial project code, a four digit project number, and a single or double digit number assigned to the particular design. For watershed designs, the number shall correspond to the site number assigned in planning. For EWP and RC&D, the number is assigned chronologically. Examples: Watershed Operations: NJ-08-2010-5; Watershed Rehabilitation: NJ-07-2002-11; EWP: NJ-16-5015-3; RC&D: NJ-11-6002-30

(4) Where there is a significant volume of data in a component group, the assigned number shall be followed by a suffix designating a component group of data. The suffix will be as follows:

Alignment and Survey Calculations	A
Design Report (General)	D
Embankment Design	E
Geology Report, Soils Report, Lab Data	G
Hydrology and Hydraulics	H
Drawings, Maps, and Air Photos	P
Quantities	Q
Structural Design Data	S
Land Rights Maps	LR

(5) Drawings for deficiency repairs to a project that has been assigned a drawing number shall bear the original drawing number followed by the suffix R.
