
**NEW JERSEY
WATER MANAGEMENT GUIDE
CONTENTS**

| | | |
|------------------|------------------|---|
| Contents: | Chapter 1 | General a) Introduction b) Types of drainage systems c) Investigations and planning |
| | Chapter 2 | Surface Drainage a) General b) Types of channels c) Types of open drain systems d) Land forming e) Drainage channel design f) Channel vegetation and maintenance |
| | Chapter 3 | Subsurface Drainage a) General b) Types of systems c) Subsurface drainage design d) Drain envelope e) Appurtenances f) Installation g) Safety h) Maintenance |
| | Chapter 4 | Interception Drainage a) Ground water movement b) Location of interceptor c) Use of surface or subsurface drains d) Size of drains |
| | Chapter 5 | Water Table Management a) General b) Water table management |
| | Chapter 6 | Pump Drainage a) General b) Surface drainage pumping conditions c) Subsurface drainage pumping conditions d) Relationship of pumping plant to drainage system e) Economic justification of pumping plant f) Pumping from subsurface aquifers g) Basic information required for plant design h) Maintenance |

Glossary

References

Appendix A Drainage Runoff Curves

Appendix B Drainage Recommendations

Appendix C Drainage for Agricultural Structures

- a) Introduction
- b) Site selection
- c) Surface drainage
- d) Subsurface drainage
- e) Grading
- f) Roof runoff
- g) Dewatering
- h) Maintenance

Appendix D Restoration of Drained Areas

- a) Introduction
- b) Goals and objectives
- c) Site evaluation
- d) Drainage alteration measures
- e) Maintenance

Appendix E Tools and Worksheets
