

Michigan Supplemental Enhancement Activity

Plant Enhancement Activity – PLT05 – Multi-story cropping, sustainable management of non-timber forest plants

An approved management plan will be developed with a qualified consulting forester.

The following plant species are eligible native non-timber forest products for this enhancement. Only species native to Michigan are eligible:

Food
American hazelnut
blueberries, huckleberries
currants, gooseberries
elderberries
fern fiddleheads
mushrooms
pawpaw
raspberries, blackberries, thimbleberry
roses
serviceberry species
wild leeks

Botanicals/Medicinal Plants
American ginseng
goldenseal
Labrador tea
partridgeberry
Solomon's seal
wintergreen
witch hazel

Decorative/Floral/Handicrafts
birch
ferns and fern allies, i.e., club mosses, princess pine, etc.
grape
pine, spruce, cedar, fir, hemlock

Note: some plants are commonly utilized in multiple categories. For example, roses could be used for food, medicinal and decorative products.
