

April 1, 1993

NATIONAL ENGINEERING MANUAL (SECOND EDITION)
210-V, Amendment IL-17

SUBJECT: ENG - Spot checking conservation practice application
documented by others.

Purpose: To distribute NEM pages IL501-10(1) through IL501-10(8).

Effective Date: This supplement is effective upon receipt.

National Engineering Manual Amendment IL-14 was inadvertently issued on white paper. That information is reissued as Amendment IL-17.

Also, field office staffs are instructed to review paragraph IL501-10(1), page IL501-10(4), which is part of this transmittal. That paragraph sets forth SCS-IL policy for spot checking work documented by contractors. This policy applies, regardless of formal qualification. All contractors (see definition in paragraph IL501.10(a)) who provide practice documentation will have their work spot checked by field office staff.

Filing Instructions: Remove existing pages IL501-10(1) through IL501-10(8) and replace with attached pages.
