

NOTES:

1. If standard steel "T" posts (1.33 lbs/ft with the plate) are used as line posts, install 2 3/8" Schedule 40 steel pipe post (capped) or 6 inch diameter wood post at least every 150 feet apart.
2. For woven wire, top and bottom strands shall be 12 1/2 gauge or heavier; intermediate strands shall be 14 1/2 gauge or heavier.
3. For barbed wire, each line wire shall consist of 2 twisted strands of 12 1/2 gauge wire or Hi-tensile strength wire of 15 1/2 gauge. The barbs shall be either 2-point barbs on approximate 4 inch centers or 4-point barbs on approximate 5 inch centers.
4. All wire shall have Class III galvanization.
5. Standard woven wire fences may have line posts spaced up to 15 feet apart. Hi-Tensile woven wire fence may have line posts spaced up to 20 feet apart. Closer spacing is required where needed for inclines or changes in topography.
