

NOTES:

1. For cold weather protection, insulate inside of casing above coupler with fiberglass batting in waterproof bag, foam rubber or styrofoam.
2. Casing and cap material will be PVC schedule 40 or greater and UV resistant, or as directed by engineer.
3. Support stake material should be steel, rigid fiberglass or rigid plastic. Fasten to riser pipe with stainless steel, copper, heavy plastic, or other method as directed by engineer.
