

Watershed Improvement—Riparian Ranking Tool Questions and Instructions

USDA-NRCS—Salt Lake City, Utah

2008-Environmental Quality Incentives Program

Note to all users: The official Application and Evaluation Ranking Tools are located in Protracts.

NATIONAL Priority Issues

In order to answer yes to the National issues/priority questions you must have adequate documentation that the practice(s) will conserve the priority issue. This documentation can be in the form of a list of Threatened and Endangered species that will be impacted by the practices on the UT-CPA-52 or in the Tech Notes. See the species of concern list. Talk with your Area or partner biologist for more information on these species.

- ◆ Technical questions on this ranking tool should be directed to Area Technical and Program Specialists.

QUESTION #1: Will the treatment you intend to implement using EQIP result in considerable reductions of non-point source pollution, such as nutrients, sediment, pesticides, excess salinity in impaired watersheds consistent with TMDL's where available as well as the reduction of groundwater contamination or point source such as contamination from confined animal feeding operations?

- To claim these points, the proposed project must be expected to meet quality criteria for all applicable NRCS Water Quality criteria.

QUESTION #2: Will the treatment you intend to implement using EQIP result in the conservation of a considerable amount of ground or surface water resources?

- To claim these points, the proposed project must be expected to meet quality criteria for all applicable NRCS Water Quantity criteria.

QUESTION #3: Will the treatment you intend to implement using EQIP result in a considerable reduction of emissions, such as particulate matter, nitrogen oxides (NOx), volatile organic compounds, and ozone precursors and depleters that contribute to air quality impairment violations of National Ambient Air Quality Standards?

- To claim these points, the proposed project must include one or more of the conservation practices on page 3. (This is not the list of eligible practices)

QUESTION #4: Will the treatment you intend to implement using EQIP result in a considerable reduction in soil erosion and sedimentation from unacceptable levels on agricultural land?

- To claim these points, soil erosion must go from above T to T or below T as a result of the proposed project OR Quality criteria for Soil Condition must be met as a result of implementing the proposed project.

QUESTION #5: Will the treatment you intend to implement using EQIP result in a considerable increase in the promotion of at-risk species habitat conservation?

- To claim these points, the project must be expected to meet quality criteria for one or more of the four national at-risk species resource concerns, as follows:

National At-Risk species Resource Concerns

- Plant Condition; Threatened and Endangered Plant Species
- Plant Condition; T&E Plant Species: Declining Species, Species of Concern
- Fish and Wildlife; Threatened and Endangered Fish and Wildlife Species
- Fish and Wildlife; T&E Species: Declining Species, Species of Concern

At-risk **plant** species are in Appendix C. - Rare Plant Species by Habitat Type

At-risk **animal** species are in Appendix A. - Utah CWCS Tier I, II, and III Species List.

See Utah-NRCS Website—Programs-EQIP tab.

EQIP National Priorities

1. Reductions of **nonpoint source** pollution, such as nutrients, sediment, pesticides, or excess salinity in impaired watersheds consistent with TMDLs where available as well as the reduction of groundwater contamination and reduction of point sources such as contamination from confined animal feeding operations;
2. Conservation of **ground and surface water** resources;
3. Reduction of **emissions**, such as particulate matter, nitrogen oxides (NOx), volatile organic compounds, and ozone precursors and depleters that contribute to air quality impairment violations of National Ambient Air Quality Standards;
4. Reduction in **soil erosion and sedimentation** from unacceptable levels on agricultural land; and
5. Promotion of **at-risk species** habitat conservation.

STATE Priority Issues

Questions 1: Does the cooperator have a current RMS plan on the CTU for the EQIP project?

- To claim these points, the applicant must have an RMS plan which addresses all resource concerns on the Conservation Treatment Unit (CTU) being offered for EQIP funding. (NPPH Amendments 3,600.6-4)

Question 2: Does the cooperator have one or more active contracts that are behind schedule?

- Review 440-CPM, 512 and CCC-1200 Appendix signed by participant. Behind schedule is defined as an unapplied practice scheduled to have been installed prior to date of ranking.

Question 3: Does the applicant have one or more contracts that have been cancelled, or terminated (or are currently in the process of being cancelled/terminated)?

- Answer as appropriate.

Question 4: Does the plan address control of an invasive species identified by a state, county, or local government or by a local Cooperative Weed Management Area as being a noxious species?

- Identify if the target species identified by the applicant is listed as noxious and/or invasive. Control of these species must be addressed THROUGH THE APPROPRIATE PRACTICES in the contract if answered yes.

Question 5: Is the project in an area that is covered by an approved area wide plan as defined by the National Planning Procedures Handbook?

- Is the planned project in an approved area wide plan as defined by the National Planning Procedures Handbook, and been designated as such by the Assistant State Conservationist for Field Operations? In order to answer yes to this question all of these REQUIREMENTS MUST BE MET.

Question 6: To claim points for this question, the applicants project must be located within the impaired watershed or upstream of a 303(d) listed stream segment or water body. The project being implemented must provide measurable benefits to the reduction of non-point source pollutants for which the TMDL or 303(d) listing was established.

Restoration of Riparian Area

Questions 7-16: Feet of Riparian area that meets Quality Criteria (count both sides of stream corridor if applicable) . Answer only one question.

Management Practices:

Question 17: Has the participant committed to provide for the installation of the applicable management incentive practice for 3 years, and will a management incentive practice be applied to 100% of the contracted acres .

Permits:

Questions 18-19: Answer only one question.

18—Have all necessary permits been obtained.

19— Have necessary permits been applied for.

(If necessary permits have not been requested or obtained, do not answer either question.)

Conservation Practices—to claim points for National Priority Question #3, the proposed project must include one or more of the following practices:

Access Road (560)
 Irrigation System, Surface and Subsurface (443)
 Alley Cropping (311)
 Irrigation Water Management (449)
 Amendments for the Treatment of Agricultural Waste (591)
 Mulching (484)
 Anaerobic Digester, Controlled Temperature (366)
 Nutrient Management (590)
 Animal Mortality Facility (316)
 Pasture and Hay Planting (512)
 Anionic Polyacrylamide (PAM) Erosion Control (450)
 Pest Management (595)
 Atmospheric Resource Quality Management (370)
 Prescribed Burning (338)
 Closure of Waste Impoundment (360)
 Prescribed Grazing (528)
 Composting Facility (317)
 Pumping Plant (533)
 Conservation Cover (327)
 Range Planting (550)
 Conservation Crop Rotation (328)
 Recreation Area Improvement (562)
 Constructed Wetland (656)
 Recreation Land Grading and Shaping (566)
 Contour Buffer Strips (332)
 Recreation Trail and Walkway (568)
 Contour Farming (330)
 Residue Management, Seasonal (344)
 Contour Orchard and Other Fruit Area (331)
 Restoration and Management of Declining Habitats (643)
 Cover Crop (340)
 Riparian Forest Buffer (391)
 Critical Area Planting (342)
 Riparian Herbaceous Cover (390)
 Cross Wind Ridges (589A)
 Rock Barrier (555) Cross Wind Trap Strips (589C)

Stream Habitat Improvement and Management (395)
 Deep Tillage (324)
 Stream bank and Shoreline Protection (580)
 Drainage Water Management (554)
 Strip-cropping (585)
 Feed Management (592)
 Surface Roughening (609)
 Field Border (386)
 Tree/Shrub Establishment (612)
 Filter Strip (393)
 Upland Wildlife Habitat Management (645)
 Firebreak (394)
 Use Exclusion (472)
 Forest Site Preparation (490)
 Vegetative Barrier (601)
 Forest Stand Improvement (666)
 Waste Facility Cover (367)
 Fuel Break (383)
 Waste Storage Facility (313)
 Grassed Waterway (412)
 Waste Treatment Lagoon (359)
 Grazing Land Mechanical Treatment (548)
 Waste Utilization (633)
 Heavy Use Area Protection (561)
 Wastewater Treatment Strip (635)
 Hedgerow Planting (422)
 Wetland Creation (658)
 Herbaceous Wind Barriers (603)
 Wetland Enhancement (659)
 Irrigation Canal or Lateral (320)
 Wetland Restoration (657)
 Irrigation Field Ditch (388)
 Wetland Wildlife Habitat Management (644)
 Irrigation System, Micro irrigation (441)
 Windbreak/Shelterbelt Establishment (380)
 Irrigation System, Sprinkler (442)
 Windbreak/Shelterbelt Renovation (650)
