5. Ecological Dynamics of the Site

Site Type: Rangeland

Ecological Site Name: Mountain Stony Loam (Mountain big sagebrush)

Site Number: 047CY462UT

As this site deteriorates due to grazing pressure bluebunch wheatgrass, needleandthread and bluegrass decrease while big sagebrush, western wheatgrass, letterman needlegrass, lupine, and aster may increase. Fire will kill big sagebrush and often decrease bitterbrush while western wheatgrass, lupine and low rabbitbrush increase.
