## My.NRCS HOSTS OFFICIAL NRCS STATE CALENDAR

The NRCS National Calendar, which now features an individual calendar for each state, is a powerful tool to help employees stay abreast of important NRCS and conservation partner events. The online calendar includes meetings/conferences, reports, rollouts, significant dates, training, teleconferences, and other events that have broad interest among NRCS employees.

The calendar is available to all NRCS employees by going to the "NRCS Today" tab on my.NRCS. Look for the calendar header in the center of the page where employees can click on "view the calendar" and see the national calendar, which lists events of all states, or click on "Utah" from the drop down menu and see just Utah events. Various types of events are color coded and various screens can be seen, such as a monthly or weekly view of events. If you just want to see a list of "coming soon" events for Utah, click on "Utah" from the drop down menu next to Filter Events By: to see a listing of coming events.

Content of the Utah calendar is managed by [Marie-Celeste Gonnella](#) and [Ron Francis](#), who are authorized to add or remove content. Please provide them with the necessary information when you want an item added or removed from the Utah calendar.

State Conservationist Sylvia Gillen said this is the official activity calendar for Utah NRCS. Please help us make it effective by providing appropriate event information and by reviewing the calendar often. This would be a good item to review at staff meetings where actual use of the calendar could be demonstrated and discussed. Our goal is to be better informed and coordinated employees, she said.
