

## UNIFIED SOIL CLASSIFICATION SYSTEM (OK-SOI-006)

### Overview

This course will provide the participants with the knowledge to properly classify the soil, based upon the unified soil classification system by field identification. Only commonly used unified soil classes will be discussed and demonstrated in this class.

### Objectives

1. Learn how to determine if a soil is fine grained or coarse grained.
2. Learn how to perform different field tests to correctly identify the proper unified class.

### Prerequisites

NRCS employees who have been employed for a minimum of six months.

### Duration

1 day
