

RIPARIAN FOREST BUFFER DESIGN (OK-ECS-009)

Overview

This course will train individuals on how to design a riparian forest buffer when planning this practice for a landuser.

Objectives

Upon completion of this training, participants will be able to:

1. Understand the standard and specification Riparian Forest Buffer (391).
2. Apply the knowledge learned to design a Riparian Forest Buffer and fill out the appropriate job sheets.
3. Use a sampling method to document and determine if there is sufficient natural regeneration to avoid additional plantings of trees before fencing a riparian area.

Prerequisites

Must be someone with planning responsibility.

Duration

1 day
