

CP1 (Introduced Grasses) & CP2 (Native Grasses) CRP Mid Contract Management

Name: _____

See attached aerial photo for areas to be treated.

Field(s): _____

Tract: _____

CP1 (Introduced Grasses) and CP2 (Native Grasses)

– For new seedings, MCM will be applied in years 4, 5, and 6 of the contract. For existing seedings MCM can be applied in year 1.

-Eligible MCM options (**Choose one**)

	MCM Options	Field #	Acres
	Disk		
	Disk & Interseed		
	Spray		
	Spray & Interseed		
	Burn		
	Burn & Interseed		
	Interseed Only*		

Begin MCM in _____.

* See following special interseeding information.

- According to NRCS FOTG (327) Conservation Cover standard, interseeding requires that existing vegetation be weakened prior to interseeding. For CRP, the stand may be weakened by disking, prescribed fire or chemical application prior to the interseeding operation.
 - IF the stand was hayed or grazed, these activities also meet the criteria of weakening the stand prior to interseeding.
- Time periods for CRP interseeding of introduced forbs and legumes: August 2 to September 30 or March 1 to May 14.
- Time periods for CRP interseeding of native forbs and legumes: April 15 to May 14.
