

CP42 (Pollinator Habitat)

CRP Mid Contract Management

Name: _____

Tract: _____

Field(s): _____

See attached aerial photo for areas to be treated.

CP 42 (Pollinator Habitat) – MCM will be applied in years 4, 5 and 6. (choose one)

	MCM Options	Field #	Acres
	Disk		
	Disk & Interseed		
	Burn		
	Burn & Interseed		
	Interseeding Only*		

* See following special interseeding information.

- According to NRCS FOTG (327) Conservation Cover standard, interseeding requires that existing vegetation be weakened prior to interseeding. For CRP, the stand may be weakened by disking, prescribed fire or chemical application prior to the interseeding operation.
 - IF the stand was hayed or grazed, these activities also meet the criteria of weakening the stand prior to interseeding.
- Time periods for CRP interseeding of introduced forbs and legumes: August 2 to September 30 or March 1 to May 14.
- Time periods for CRP interseeding of native forbs and legumes: April 15 to May 14.
- Interseed shall include species from all three bloom periods. Minimum is one species per bloom period. No grass will be interseeded.

Begin MCM in _____.
