

OPTION 1

NOTE: Plate May Be Applied Using Adhesive Concrete Anchors or Saddle Over Top of Wall.

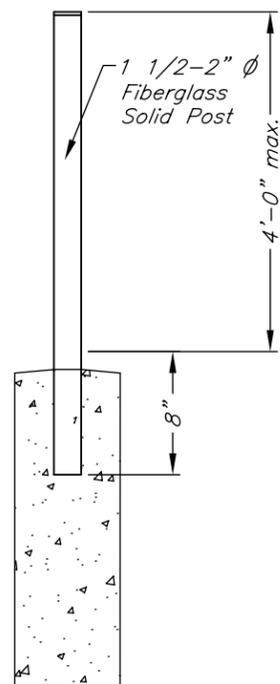

OPTION 3

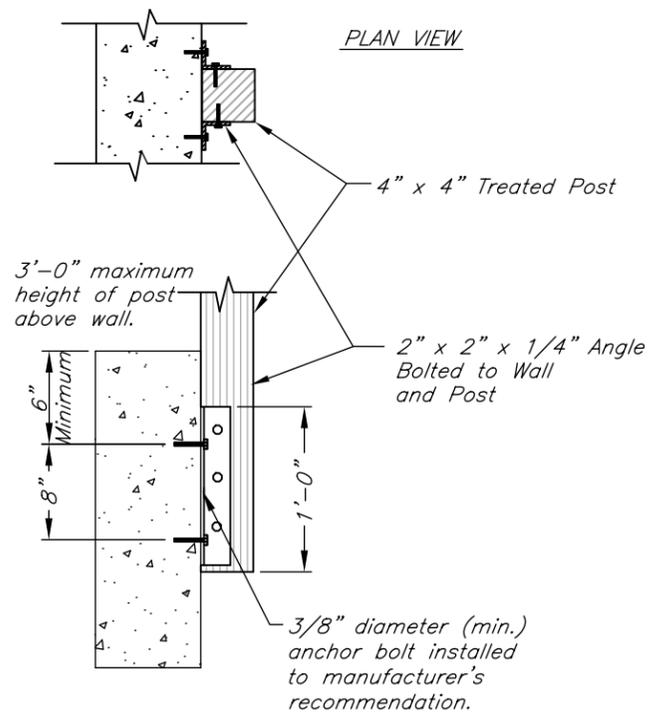

Notes

1. All steel will have 1 1/2" of concrete cover.
2. Attach plastic pin lock insulators to post with anchors and screws.

OPTION 5

OPTION 2

OPTION 4

NOTES for all options:

The options shown are illustrative of the recommended methods of attaching fence posts to concrete walls.

All exposed metal is to be stainless, galvanized, or coated to prevent rust. Wood is to be treated. All exposed rebar is to be painted or coated. Exposed steel is to be isolated from wall reinforcement.

When inserting fixtures into top of wall, shape concrete to drain water away from fixture.
