

REX Extensions (Existing Practices)

CRP Mid Contract Management

Name: _____ Tract: _____

Field(s): _____

See attached aerial photo for areas to be treated.

REX Extensions – (Existing Practices) – contract extensions may be modified to include voluntary MCM which must be implemented before the start of the last 3 years of the contract. All Grasses – Options (**choose one**)

MCM Options	Field #	Acres
Disk		
Disk & Interseed		
Spray		
Spray & Interseed		
Burn		
Burn & Interseed		
Interseed Only*		

Trees Already Established – MCM is Tree Thinning, as determined by the District Forester.

*** See following special interseeding information.**

- According to NRCS FOTG (327) Conservation Cover standard, interseeding requires that existing vegetation be weakened prior to interseeding. For CRP, the stand may be weakened by disking, prescribed fire or chemical application prior to the interseeding operation.
 - IF the stand was hayed or grazed, these activities also meet the criteria of weakening the stand prior to interseeding.
- Time periods for CRP interseeding of introduced forbs and legumes: August 2 to September 30 or March 1 to May 14.
- Time periods for CRP interseeding of native forbs and legumes: April 15 to May 14.

Begin MCM in _____.

United States Department of Agriculture
Natural Resources Conservation Service

Helping People Help the Land
