

# CP38E (Vegetative Cover-Native Grass Already Established)

## CRP Mid Contract Management

Name: \_\_\_\_\_

See attached aerial photo for areas to be treated.

Field(s): \_\_\_\_\_

Tract: \_\_\_\_\_

### CP 38E (Vegetative Cover-Native Grass Already Established)

– MCM will be applied in years 1, 3, and 5 of the contract.  
(choose one)

	MCM Options	Field #	Acres
	Disk		
	Disk & Interseed		
	Burn		
	Burn & Interseed		

\* See Interseeding on page 1.

Begin MCM in \_\_\_\_\_.

### \* See following special interseeding information.

- According to NRCS FOTG (327) Conservation Coverstandard, interseeding requires that existing vegetation be weakened prior to interseeding. For CRP, the stand may be weakened by disking, prescribed fire or chemical application prior to the interseeding operation.  
- IF the stand was hayed or grazed, these activities also meet the criteria of weakening the stand prior to interseeding.
- Time periods for CRP interseeding of introduced forbs and legumes: August 2 to September 30 or March 1 to May 14.
- Time periods for CRP interseeding of native forbs and legumes: April 15 to May 14.
