

Air Pollution
stinks and harms
the environment

- Plant a tree
- Recycle
- Ride a bike

YOU KNOW WHAT?

You breathe in
13 pints of air
every minute.

What's so great about **AIR**

We breathe air every day!

- It protects us from the sun.
- It helps us grow strong.

All animals need to live
in a good home.
A good habitat
needs:
-Food
-Water
-Protection

YOU KNOW WHAT?

There are over 150 owl species
in the world.

What's so great about **ANIMALS**

Animals are fun to watch!

- We learn a lot from them.
- They help the environment.

**Conserve energy!
Don't waste it.**

- Turn off the lights.
- Don't leave the fridge open.
- Use less gas.

YOU KNOW WHAT?

**One wind turbine
can provide
power for 300
houses!**

What's so great about **ENERGY**

Energy makes things happen!

- It moves your body.
- It powers your home.

PHOTOSYNTHESIS!

Nature's perfect factory.

- Grow the right plants.
- Pollinators love big blooms.

YOU KNOW WHAT?

20% of the world's oxygen comes from the Amazon rainforest.

What's so great about **PLANTS**

Plants do so much for us!

- They provide food and oxygen.
- They help stop erosion.

Soil is the top layer of the earth.

Like frosting on a cake!

- Conserve it!
- Protect it!
- Healthy Soil
=
- Healthy plants!

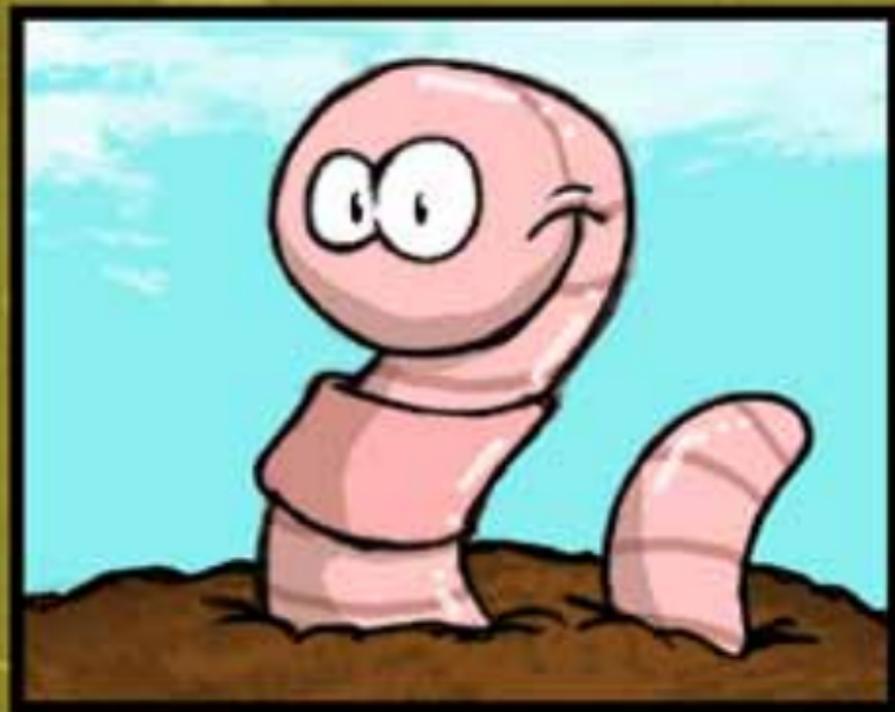

YOU KNOW WHAT?

It takes nature 500 years to create only 2 centimeters of soil!

What's so great about **SOIL**

Soil is full of life!

- It grows plants.
- It absorbs rain.

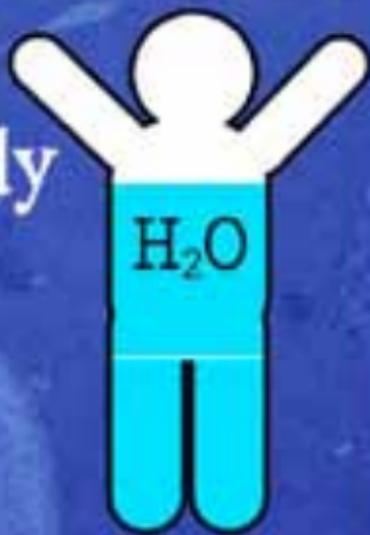

The only water we will have is what we have now.

- Don't waste it!
- Keep water clean!
- Protect it.

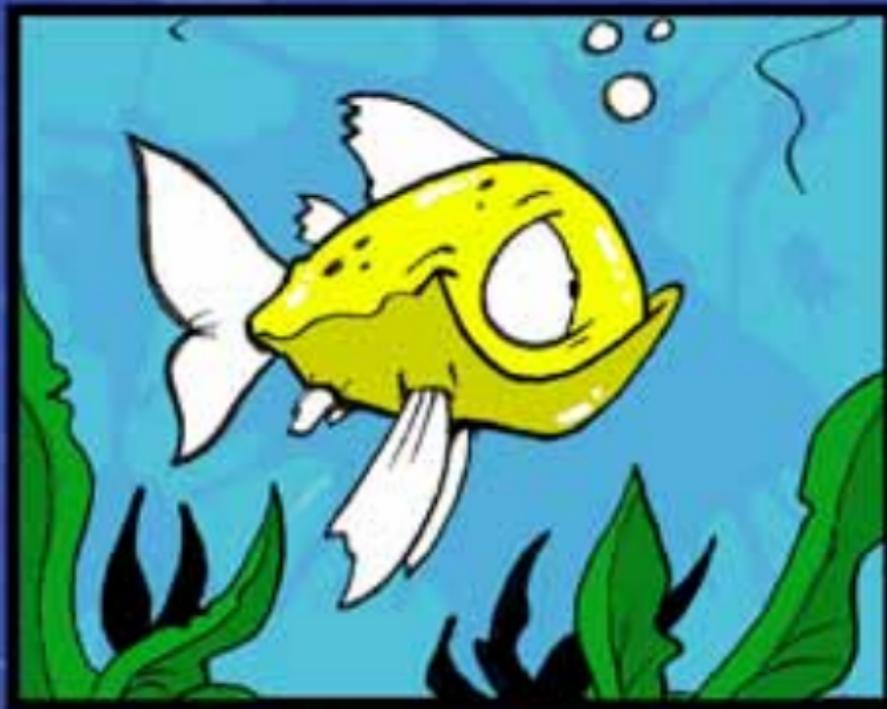

YOU KNOW WHAT?

2/3 of your body
is
WATER!

What's so great about **WATER**

All life needs water!

- We drink it.
- We play in it.
