National Priorities Addressed

Issue Questions	Responses
1. Will the treatment you intend to implement using EQIP result in a considerable reduction of non-point source pollution, such as nutrients, sediment, pesticides, excess salinity in impaired watersheds with total maximum daily loads (TMDLs) where available, groundwater contamination or point sources such as contamination from confined animal feeding operations?	Yes <input type="radio"/> or No <input type="radio"/>
2. Will the treatment you intend to implement for water conservation or irrigation efficiency using EQIP result in a considerable reduction in water use?	Yes <input type="radio"/> or No <input type="radio"/>
3. Will the treatment you intend to implement using EQIP result in a considerable reduction of emissions, such as particulate matter, nitrogen oxides (NOx), volatile organic compounds, and ozone precursors and depleters that contribute to air quality impairment violations of National Ambient Air Quality Standards?	Yes <input type="radio"/> or No <input type="radio"/>
4. Will the treatment you intend to implement using EQIP result in a considerable reduction in soil erosion and sedimentation from unacceptable levels on agricultural land?	Yes <input type="radio"/> or No <input type="radio"/>
5. Will the treatment you intend to implement using EQIP result in a considerable increase in the promotion of at-risk species habitat conservation?	Yes <input type="radio"/> or No <input type="radio"/>
6. Will the treatment that you intend to implement using EQIP result in considerable benefits to residue management, nutrient management, air quality management, invasive species management, pollinator habitat, and animal carcass management technology or pest management?	Yes <input type="radio"/> or No <input type="radio"/>
7. Will the treatment that you intend to implement using EQIP result in energy conservation benefits?	Yes <input type="radio"/> or No <input type="radio"/>

State Issues Addressed

Issue Questions	Responses
Only one yes answer is allowed for questions 1 through 3. If more than one species is being planted as a result of the EQIP contract choose the option which provides the higher points.	
1. Hardwoods, Longleaf Pine, Shortleaf Pine will be planted as a result of the EQIP contract.	Yes <input type="radio"/> or No <input type="radio"/>
2. Loblolly or White Pine will be planted at a rate of no more than 360 trees per acre as a result of the EQIP contract.	Yes <input type="radio"/> or No <input type="radio"/>
3. Loblolly or White Pine will be planted at a rate of no more than 480 trees per acre as a result of the EQIP contract.	Yes <input type="radio"/> or No <input type="radio"/>
.	
4. Livestock will be permanently excluded from 100% of the woodland where livestock currently have access to the woodland.	Yes <input type="radio"/> or No <input type="radio"/>
6. Soil erosion issues that can potentially affect surface water quality will be treated as a result of the EQIP contract.	Yes <input type="radio"/> or No <input type="radio"/>
7. Denuded skid trails, log roads and landings will be re-vegetated as a result of the EQIP contract. (Re-vegetation is encouraged even if state BMP practice standards do not require it.)	Yes <input type="radio"/> or No <input type="radio"/>
8. Marginal pastures with predominant slopes greater than 10% will be planted to trees or shrubs as a result of the EQIP contract.	Yes <input type="radio"/> or No <input type="radio"/>
9. Cropland will be converted to trees as a result of the EQIP contract.	Yes <input type="radio"/> or No <input type="radio"/>
10. Riparian forest buffers will be established using hardwoods planted at 110 trees per acres as a result of the EQIP contract.	Yes <input type="radio"/> or No <input type="radio"/>

11. The area being considered for an EQIP contract is within an impaired watershed shown on the "Impaired Waters of Virginia" Toolkit GIS layer.	Yes <input type="radio"/> or No <input type="radio"/>
Only one yes answer is allowed for questions 12 through 14	
12. The EQIP contract will include Forest Stand Improvement for hardwood species	Yes <input type="radio"/> or No <input type="radio"/>
13. The EQIP contract will include Forest Stand Improvement for a Pine Pre-Commercial Thinning.	Yes <input type="radio"/> or No <input type="radio"/>
14. The EQIP contract will include Forest Stand Improvement for Pine Release.	Yes <input type="radio"/> or No <input type="radio"/>
Only one yes answer is allowed for questions 15 and 16.	
15. As a result of the proposed EQIP contract the Forest Stewardship Plan will be completed or (3) or more practices contained in the plan will be established.	Yes <input type="radio"/> or No <input type="radio"/>
16. As a result of the proposed EQIP contract two (2) conservation practices contained in the Forest Stewardship Plan will be established.	Yes <input type="radio"/> or No <input type="radio"/>
