

**TRIBAL CONSULTATION PROTOCOL
BETWEEN
THE UNITED STATES DEPARTMENT OF AGRICULTURE
NATURAL RESOURCES CONSERVATION SERVICE
AND
THE BOIS FORTE BAND OF CHIPPEWA INDIANS**

This Tribal Consultation Protocol implements Stipulation 2, Parts A and B. (State Agreements and Tribal Consultation Protocols; American Indian Tribal Consultation Protocols) of the Programmatic Agreement (PA) among the United States Department of Agriculture Natural Resources Conservation Service, the Advisory Council on Historic Preservation and the National Conference of State Historic Preservation Officers, relative to conservation assistance on private and public lands.

The purpose of this agreement is to facilitate Minnesota Natural Resources Conservation Service conservation activities and to comply with Tribal laws and regulations pertaining to cultural resources on all lands of the Bois Forte (Nett Lake) Band and all other lands held in fee title by the Bois Forte Tribe including but not limited to the territorial coverage outlined in the Bois Forte Cultural Resources Code.

The Minnesota Natural Resource Conservation Service (hereinafter called MN NRCS) and the Bois Forte (Nett Lake) Band of Minnesota Chippewa agree that execution of this Protocol provides for implementation of policies and procedures developed by the MN NRCS to more effectively assure that effects of conservation activities on cultural resources within the exterior boundaries of American Indian Reservations are thoroughly considered in the earliest planning stages and that cultural resource protection is accomplished as efficiently as possible.

WHEREAS, the United States Department of Agriculture, Natural Resources Conservation Service (NRCS) recognizes the status of the Bois Forte Band of Minnesota Chippewa (hereinafter called the Tribe) as a Sovereign Nation and a federally recognized Indian tribe with direct ties to lands within Minnesota; and

WHEREAS, the NRCS provides financial assistance to private landowners, American Indian Tribes, municipalities, counties, state, and federal agencies; and

WHEREAS, the NRCS has determined that NRCS programs providing financial assistance may result in effects to historic properties included in, or eligible for inclusion in the National Register of Historic Places (National Register); and

WHEREAS, the Nationwide Programmatic Agreement (Exhibit 1) allows NRCS to comply programmatically with its obligations under Section 106 and 110 (f) of the National Historic Preservation Act (NHPA) (16 U.S.C. 470f) and requires Natural Resources Conservation Service to follow its policies and procedures for protecting cultural resources issued in the General Manual (GM) 420, Part 401 “Cultural Resources [Archeological and Historic Properties]” (Exhibit 2), the NRCS National Cultural Resources Handbook 190, Part 601.62; and

WHEREAS, the Tribe wishes to consult on NRCS undertakings in accordance with the National Historic Preservation Act (NHPA) (16 U.S.C. 470f) and the Bois Forte Cultural Resources Code; and

WHEREAS, the NRCS has consulted with the Bois Forte Tribe pursuant to 36 CFR 800.2(c)(1)(i) of the regulations implementing Section 106 of the National Historic Preservation Act (NHPA), 16 USC 470f; and

WHEREAS, the NRCS and the Tribe wish to develop an agreement to expedite the compliance process, speed delivery of conservation practices, and protect cultural resources, including traditional cultural and spiritual places; and

WHEREAS, the definitions given in the NRCS GM 420 Part 401.2 are applicable throughout this protocol;

THEREFORE, the Minnesota NRCS and the Tribe agree to the following stipulations and will ensure that they are implemented:

STIPULATIONS

I. COMMUNICATION

- A. For the purpose of signing of the Tribal Protocol the MN NRCS State Conservationist will communicate directly with the Tribe's Tribal Historic Preservation Office (THPO).
- B. For the purpose of developing, amending, or reviewing the Protocol procedures or questions on MN NRCS cultural resources policy, the Tribe's THPO will communicate directly with the MN NRCS Cultural Resources Specialist (CRS).
- C. For the purpose of project compliance activities, MN NRCS CRS will communicate directly with the Tribe's THPO for concurrence determinations of effect and eligibility.
- D. Whenever possible, MN NRCS and the Tribe's THPO will utilize electronic mail to communicate to increase efficiency and provide improved cultural resources compliance and protection. However, all formal compliance correspondence and final reports will be submitted in hard copy with appropriate signatures by MN NRCS. All return correspondence from the Tribe's THPO to MN NRCS will be hard copy with appropriate signatures.
- E. Cultural resource and participant information is not subject to the Freedom of Information Act (FOIA). Section 304 of the NHPA and other Federal laws and program requirements restricts public access to information concerning a producer, an undertaking, and its effect on cultural resources.

II. NRCS RESPONSIBILITIES

- A. MN NRCS State Conservationist is the responsible Federal Official for cultural resources compliance and the protection of cultural resources in all MN NRCS activities.
 - B. MN NRCS District Conservationists (DC) are responsible at the Field Office level for implementing MN NRCS cultural resources policies and procedures, and the compliance process outlined in this Protocol.
 - C. The CRS will oversee the MN NRCS cultural resources review process and will coordinate directly with the NRCS DCs and the Tribe's THPO.
-

- D. Any cultural resources work conducted by the MN CRS on any Indian Lands will be conducted only in cooperation with and authorization from the Tribe's THPO.
- E. The Minnesota NRCS further agrees that access to specific site location data will be restricted to the Cultural Resources Specialist (CRS).
- F. MN NRCS CRS must have an advanced degree in archeology, or in architectural history, historical architecture or history with an archaeology minor, and meet other academic and experience requirements for his/her discipline as found in *Archaeology and Historic Preservation; Secretary of the Interior's Standards and Guidelines, Federal Register* 1983, Vol. 48, No. 190, pages 44738-44739. MN NRCS CRS will document that they have met the above requirements in a vita on file with the Tribe's THPO.
- G. The CRS shall be responsible for:
 - 1. Formulating state MN NRCS cultural resource guidance and procedures as it relates to consultation with Federally Recognized American Indian Tribes.
 - 2. Providing technical assistance for NRCS projects and in erosion control and protection of eroding cultural resources when requested by the Tribe's THPO and as time and staff resources permit. Requests will be coordinated directly through the CRS.

III. BOIS FORTE (NETT LAKE) TRIBE RESPONSIBILITIES:

- A. The Tribe agrees to review compliance documentation on undertakings as specified for cultural resource review in Exhibit 3 (Conservation Practices Classification). The Tribe's THPO further agrees to comment in writing regarding the undertakings within 60 days of receipt of the Initial Review Request. Failure of the THPO to respond to the initial review request within 60 days may be construed to indicate that no adverse effects are expected from the proposed undertakings.

IV. USE OF NRCS FIELD OFFICE PERSONNEL

MN NRCS provides formal and informal cultural resources training to NRCS field office personnel and conservation district staff that has professional expertise other than cultural resources. NRCS Field Office personnel may accompany the NRCS CRS when assisting the Tribe in cultural resource management efforts if the THPO approves.

V. TRAINING

- A. MN NRCS will integrate cultural resources conservation and education for producers and landowners into the planning and assistance process statewide. MN NRCS will assist the Tribe with cultural resources training or with training regarding NRCS programs if the Tribe wishes.
 - B. MN NRCS will offer cultural resources training to county conservation district personnel, Farm Service Agency personnel, Rural Development personnel, Tribal Government personnel, State Agencies, and personnel from other cooperating agencies or other groups. This training will occur when it is officially requested, when it will benefit and support MN NRCS conservation mission, and when staff schedules allow.
 - C. The Tribe's Training Responsibilities: Bois Forte (Nett Lake) THPO or other interested Tribe members are encouraged to participate in MN NRCS training programs (i.e. as participants, instructors, group leaders, guest lecturers, etc.).
-

VI. NATIONAL EXEMPTIONS

This Protocol acknowledges the appropriateness of, and implements Stipulation 3, National Exemptions as found in the Nationwide Programmatic Agreement (EXHIBIT 1).

VII. NRCS PRACTICES EXEMPTED FROM CASE-BY-CASE REVIEW

EXHIBIT 3 of this Protocol identifies:

- MN NRCS practices and/or programs exempted from case-by-case review, as appropriate to the cultural, historical, and ecological conditions designated by the Tribe's THPO. These practices are primarily management related or will have minimal physical affect or impact on cultural resources.
- Those practices considered undertakings and presumed to have the potential to impact cultural resources.

VIII. COMPLIANCE ACTIVITIES AND DOCUMENTATION

- A. MN NRCS field office personnel will determine if conservation practices are subject to the Tribe's THPO review based on Stipulation VII (National Exemptions) and EXHIBIT 3 of this Protocol. Cultural Resources Reviews will be sent to the Tribe's THPO in the earliest possible stages of the planning process.
1. If a practice is not subject to review by the Tribe's THPO (i.e. is an exempt practice in accord with Exhibit 3), the DC will document this decision at the field office level and proceed with the practice.
 2. If the practice is subject to review by the Tribe's THPO (i.e. considered an undertaking in accord with Exhibit 3), MN NRCS field office personnel will provide the following information to both the MN CRS and the Tribe's THPO to assist in their determination of acceptable work on NRCS undertakings:
 - MN-CPA-048 Review Request Form (includes project location data (county, township, range, section and quarter section), description of ground or vegetation disturbing activity, NRCS Program, etc (see Exhibit 4).
 - Labeled photocopy of a section of the appropriate USGS 7.5-minute quadrangle map with the practice location or project area where ground disturbance will occur delineated or highlighted
 - Aerial photographs depicting in detail where the conservation practice(s) will be implemented.
- a. The Tribe's THPO will notify the NRCS DC and/or the NRCS CRS of the outcome of their review via letter, email, or verbally, within the time frame allotted in this Protocol (i.e. 60 days). If the review period has elapsed, a determination of no adverse effect will be documented and implementation of the conservation practice will proceed.
 - b. The DC will notify the CRS, or vice versa, of all project review outcomes whether or not they are received in writing from the Tribe's THPO. The DC will file all compliance documentation in the producer's file. The CRS will file all compliance documentation in county files for reporting purposes.
-

- c. If an archaeological survey is recommended by the Tribe's THPO, the Tribe's THPO can perform the survey with or without assistance from the NRCS CRS or NRCS Field Office personnel.
- d. If cultural resources are discovered during the planning phase of a project as a result of a field reconnaissance visit or archaeological survey, the Tribe's THPO will contact the NRCS CRS to discuss treatment options for the resource or vice versa.

IX. HUMAN REMAINS

If human remains are discovered in the area of potential effect (APE) during planning or implementation of a conservation practice, on Indian lands, all activities will cease and the Tribe's THPO will be notified in accordance with the Native American Graves Protection and Repatriation Act of 1990 (NAGPRA).

X. CURATION

When archaeological or historic material remains are recovered during the course of NRCS activities on Bois Forte lands, recovered materials are the property of the Tribe. Curation of recovered materials will be the responsibility of the Tribe with financial or technical assistance from NRCS when necessary. NRCS has no jurisdiction over federal lands within the boundaries of Bois Forte reservation. If materials are recovered during the course of an NRCS sponsored or assisted data recovery effort, the NRCS will ensure that all materials are returned to the Tribe. Associated records that are prepared or assembled in connection with a federally authorized cultural resources survey, excavation, or other study, regardless of the location of the resource, become the property of the Tribe.

XI. COMPLIANCE DOCUMENTATION

The Minnesota NRCS shall ensure that reports on all activities carried out pursuant to this agreement are provided to the Tribe's THPO.

XII. POST REVIEW DISCOVERIES

- A. MN NRCS will follow 36 CFR 800.13 for all post-review discoveries. This includes when cultural resources are discovered or unanticipated effects on cultural resources are found before or after MN NRCS has completed the section 106 process.
 - B. MN NRCS DC will inform the Tribe of discovery procedures in writing. In a discovery situation during MN NRCS administered undertakings:
 1. If previously unidentified cultural resources are encountered during implementation of a practice, all work shall cease immediately in the area of discovery and MN NRCS personnel shall notify the Tribe's THPO and the NRCS Cultural Resources Specialist.
 2. The Tribe's THPO, and the NRCS CRS, will evaluate the discovery for the NRHP eligibility; determine potential effects and treatment options, and consult on treatment options.
 3. In the case of adverse effects to cultural resources, the MN NRCS State Conservationist and MN NRCS CRS will notify and consult with the Tribe's THPO.
-

- C. If the discovery includes human remains, consultation will be carried out in accordance with Stipulation IX.

XIII TRADITIONAL CULTURAL PROPERTIES, SACRED SITES AND CEREMONIAL RITES

Traditional cultural properties, sacred sites and ceremonial rites shall be treated in the same manner as other cultural resources. Priority will be given to site avoidance. Locations of such properties will remain highly confidential.

XIV. EMERGENCIES

The following procedures will be implemented during an emergency declared by the President of the United States, the Governor of Minnesota, an authorized Tribal Official on a Reservation, the MN NRCS State Conservationist, or other authorized individual, in accord with 36 CFR 800.12 and as outlined in the NRCS National Watershed Manual, Part 509, Emergency Watershed Protection (in Draft) in Exhibit 5 (to be appended when completed). These procedures will ensure that the need to protect life and property is accomplished while taking cultural resources into account to the maximum extent congruent with rapidly changing priorities and circumstances. These emergency situations are of two types, with separate compliance processes.

- A. Emergency Activities include those declared by the MN NRCS State Conservationist, Tribal Government, or President of the United States. During Normal Emergency Activities MN NRCS CRS will make decisions for treatments to cultural resources in consultation with the Tribe's THPO. Conservation practices required in these areas will be inventoried or monitored. The Tribe's THPO will have 14 days to review MN NRCS reports in these situations instead of the regular 30 days as defined in 36 CFR 800.12 (b) (2).
- B. Urgent and Compelling Situations require that work be initiated within five days to save life or property. Regarding these situations, 36 CFR 800.12 (d) states, "Immediate rescue and salvage operations conducted to preserve life and property are exempt from the provisions of Section 106 and this part." In these declared disaster situations, MN NRCS shall proceed with the undertaking and MN NRCS CRS shall notify the Tribe's THPO as soon as possible after the situation has been identified and accepted as urgent and compelling. The waiver may be invoked in only a limited range of circumstances involving major natural disaster or imminent threat to life or property. Notification should include a description of the circumstances creating the urgent and compelling situation, work to be undertaken, geographic area to which the waiver applies, and any consideration of cultural resources already completed or planned to be completed. MN NRCS CRS will be responsible to document and avoid adverse effects to cultural resources encountered during urgent and compelling work to the fullest extent practical.

XV. REVIEW

- A. The MN NRCS and the Tribe will discuss the Protocol and any problems or unexpected issues encountered on an as needed basis.
-

- B. MN NRCS will provide the Tribe with a current list of conservation practices and/or changes or updates to the practice list.

XVI. AMENDMENTS

This agreement may be amended upon the request of either party at any time. The parties will consult in accordance with NRCS GM 420, Part 401 to consider such amendments.

XVII. DURATION

Either party may terminate this agreement at any time if, after a good faith effort to negotiate, parties do not concur. The agreement may be terminated by providing thirty (30) days written notice to the other party. Termination of the agreement shall not relieve either party of legal obligations or responsibilities under applicable Federal or Tribal laws and regulations.

Exhibit 3: Classification of Conservation Practices

Activities and Conservation Practices in Minnesota will be classified as undertakings or exempt practices. Practices which are not listed are considered undertakings and are presumed to have the potential to impact historic properties/cultural resources. New activities and practices may be added to the list and review classifications may be changed by amendment to this document.

EXEMPT PRACTICES (NOT GROUND DISTURBING):

Practices listed as not ground disturbing are not considered undertakings and no cultural resources actions are required for their installation (no review). These practices are primarily management related practices which will not have any physical effects and will not alter a cultural resource.

UNDERTAKINGS (GROUND DISTURBING):

These practices and activities are presumed to have the potential to impact cultural resources and are considered undertakings.

Copies of quad maps showing the area of potential effect for the practices will be submitted to the Bois Forte THPO and the NRCS Cultural Resources Specialist for review. The quad maps shall be photocopied according to the following instructions.

1. Copy on a 8.5 x 11 sheet of paper
 2. Copy at least one setting darker than the normal setting
 3. Center the section where the practice is to be installed in the center of the page
 4. Orient the quad so that north is at the top of the 8.5 by 11" copy page (portrait).
 5. Do not enlarge or reduce the copy.
 6. Label the quad map at the bottom of the copy. Information on the label should include:
 - County
 - Quad name
 - Landowner's name
 - Township
 - Range
 - Section
 - Quarter section
 7. Locate and highlight the Area of Potential Effect on the quad as well as any other areas that may be disturbed (e.g. borrow areas, equipment storage, etc.)
