

Check List for District Conservationist

The DWM Plan includes the following components¹:

- Farm and field information is provided.
- Objectives have been provided.
- MN Practice Standard 554 has been provided to the landowner.
- A soil map with field boundaries is included in the plan.
- A tile map is provided in the plan.
- A map of wetlands in the field (if applicable) is included in the plan.
- Optional but highly recommended: Profile(s) of the main(s) for the tile system that have control structures on them, showing structure(s) with the water level at growing season elevation, high point and low point in the field drained by the drainage system, main tile grade.
- A topographic map of the field (on 0.5' contours) is included.
- An overlay map with field boundaries, drain location(s) and topographic contours, with a determination (location and area) of the impacted area(s) is provided.
- A water table management plan is included, detailing when the stoplogs will be adjusted and by how much.
- A summary sheet that lists the pipe diameter of each proposed control structure, control elevations, the area impacted by each structure, exact location of the structure using GPS, and the depth to tile is provided as part of this plan.
- Each of the above components has been reviewed with the landowner and the landowner understands the plan.

¹ The District Conservationist will check off each item on this list before authorization of payment.
