

VRS Blackberry Startup Procedures

- Turn on cell phone by holding down the End Call/Power Key. If the phone does not turn on the battery is most likely dead.

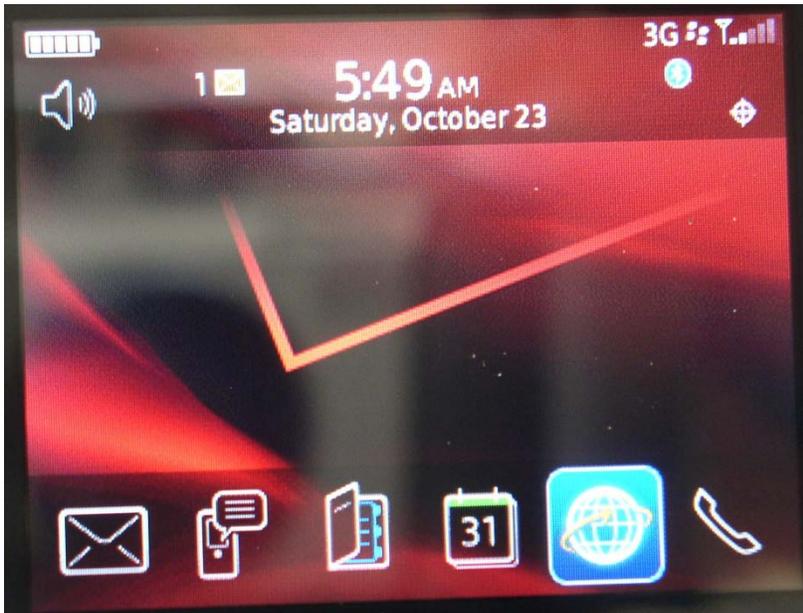

If no settings have been changed the Blackberry should now be ready for VRS use.

been changed the Blackberry

Checking Bluetooth settings.

- When the Blackberry is turned on the main menu should appear as shown below.

- Press the Menu Key and the screen similar to the one below should appear. Use the mouse key to scroll to the bottom of the menu page and the screen should look identical to that shown below. Using the mouse key, scroll the selection box over the Manage Connections Icon and press down on the mouse key to select it.

Manage
Connections Icon

- Selecting the Manage Connections Icon should bring up the dialog box shown below. For VRS use the Mobile Network and Bluetooth boxes both need to be checked. The Blackberry is now ready for VRS use.
