

SUBPART C – DAMS

PART 520 – SOIL AND WATER RESOURCES DEVELOPMENT

WI 520.23 (a)

§WI 520.23 Responsibility for classification.

(a) When a dam is inspected or the classification is reviewed and the engineer believes the dam should be reclassified, the engineer is to submit findings and recommendations on classification to the State Conservation Engineer (SCE). The SCE will obtain concurrence from the head of the multi-state design team on reclassification for Class VII and VIII jobs. When the concurrence is obtained, the dam will be reclassified. All recommendations and changes are to be documented in the case file and operation and maintenance file. The SCE will notify the Wisconsin Department of Natural Resources of all classification changes for dams that are regulated under state code and initiate any required changes in the NRCS Inventory of Dams.
