**NATIONAL ENGINEERING HANDBOOK
210-VI**

**STRUCTURAL ENGINEERING
PART 636
AMENDMENT WY-1**

SUBJECT: ENG – CHAPTER 52, “STRUCTURAL DESIGN OF FLEXIBLE CONDUITS”

Purpose: To provide all field offices a copy of Chapter 52 and supplemental information on tables to add dimensions for pipes, (PVC, steel , cast iron, etc.).

Effective Date: Effective upon receipt.

Filing Instructions: Attached is the National Engineering Handbook Part 636, Chapter 52 which is now in effect. It is also found at:

http://policy.nrcs.usda.gov/scripts/lpsiiis.dll/H/H_210_NEH_Content.htm

This information can be filed electronically or printed and filed in your NEH Series binders. If you prefer a hard copy, file the cover sheet and the tabulation sheet in front of a book titled Part 636 Structural Engineering.

Also attached is a Wyoming Supplement entitled Pipe Weights. File the attached supplemental information on pipe weights behind chapter 52, page 52F-1. When printing the pipe weights, use a color printer for ease of reading.
