73.1 - Rolling Plains and Breaks

The Rolling Plains and Breaks CRA is dissected plains having broad undulating to rolling ridgetops, loess mantled, and hilly to steep side slopes. Local relief reaches 300 feet and is dissected with narrow drainage ways and river valleys. Soils are deep on the ridgetops and moderately deep to shallow on the side slopes. Presettlement vegetation was mid grass prairies. Most of this land is in farms, both small grain crops and native grasses.
