If yes, please provide a copy with your application.

4) Program Requirements:

Any increase in size (animal units) is considered an expansion unless:

The AFO is expanding to its current permit size.

Example (if you are ranked as an existing system that is NOT expanding): Producer is permitted for 900 animal units and wants the ag waste system designed for 700 animal units.

NRCS will not make any payment until proof that your permit has been modified to reflect the reduction of animal units. Your permit cannot be for more animal units than the designed/installed system if your application is ranked as an existing system that is NOT expanding. The development and implementation of a CNMP is required for any EQIP contract with an AFO.
