## **Animal Enhancement Activity – KS-ANM19 Wildlife Corridors**

### **Kansas Criteria for National Animal Enhancement Activity – ANM19**

1. Wildlife-friendly fence bottom wire is no lower than 14 inches and top wire no higher than 42 inches with no more than four wires. Woven wire mesh (hog wire) fence is not allowed.
2. When in lesser prairie chicken range, fence markers will be added to top wire. A minimum of four markers will be placed between each two posts on all upright and functional fences. Markers will be white or other light color and be a minimum size of three inches by three inches.
3. Label directions will be followed with Windows/Pesticide Screening Tool (WIN/PST) when applying chemical to control invasive vegetation.
