**516 Pipeline**

Installation of a two-inch diameter or smaller plastic pipe as the supply line for livestock water. The unit cost is based on the linear feet (LnFt) of pipe installed and includes appurtenances such as air and pressure relief valves, hydrants, etc.	LnFt	\$1.39	\$1.67		X <sup>1</sup>
Installation of a plastic pipe larger than two-inch diameter as the supply line for livestock water. The unit cost is based on the linear feet of pipe installed and includes appurtenances such as air and pressure relief valves, hydrants, etc.	LnFt	\$1.98	\$2.37		X <sup>1</sup>
Installation of a large storage tank to reduce pipeline size or pressure requirements. The unit cost is based on the design volume in gallons and includes field preparation, gravel base or platform, and plumbing.	Gallon	\$0.45	\$0.54		X <sup>1</sup>

<sup>1</sup> This practice is only eligible in conjunction with practice 533.

**533 Pumping Plant**

Installation of solar panels, controller, and solar powered pump with associated fittings and connections for a system with a total dynamic head (TDH) greater than 100 feet, for the purpose of pumping water from a water body in order to remove livestock from the water body (e.g., pond or stream). The unit cost is each solar pump system installed.	Each	\$3,039.75	\$3,647.70		X
