Animal Enhancement Activity—KS-ANM04 Extend existing filter strips for water quality protection and wildlife habitat

Kansas Criteria for National Animal Enhancement Activity—ANM04

1. Refer to Construction Specifications 393, Filter Strip, for practice and vegetation requirements.
2. When developing wildlife-friendly seeding mixtures, refer to Construction Specifications 645, Upland Wildlife Habitat Management, for recommendations. A brood cover mix is recommended for upland game birds and grassland bird species.
3. Refer to Kansas Plant Materials Technical Note KS-1, Grass and Forb/Legume Varieties Approved for Use in Kansas, for plant adaptability information.
4. Select only native, non-invasive, perennial species for seeding mixes.
