KANSAS BULLETIN NO. KS190-12-4

SUBJECT: ECS—Manhattan Plant Materials Center Field Day

Action required by: August 31, 2012

Purpose. To provide information and guidance regarding the subject event

Expiration Date. September 30, 2013

The Natural Resources Conservation Service (NRCS) Manhattan Plant Materials Center (PMC) will be hosting a field day from 8:30 a.m. until 3 p.m. Wednesday, September 12, 2012. Directions to the PMC are attached.

The field day agenda begins with an overview and tour of the fields and facilities in the morning and breakout sessions in the afternoon. Participants are encouraged to bring a sack lunch and water for the day. Requests to attend should be sent through proper channels in your area. Areas will send a list of approved participants via email to Janelle L. Heiser, at janelle.heiser@ks.usda.gov no later than August 31, 2012.

The PMC was established in 1936, developing plants and new plant technologies for America's heartland. The PMC offers services to a diverse region of the heartland including northeastern Colorado, Kansas, Nebraska, and northern Oklahoma. The primary objective of the PMC is to develop plant materials for conservation purposes and provide support for conservation activities.

This is an excellent opportunity for new employees and partner employees who have not been to the PMC to learn firsthand what it has to offer. Priority for approval should be given to these employees.

Contact: Mark A. Janzen, Plant Materials Specialist, 785-823-4595 or mark.janzen@ks.usda.gov.
