## **Animal Enhancement Activity – KS-ANM21 Prairie Restoration for Grazing and Wildlife Habitat**

### **Kansas Criteria for Animal Enhancement Activity – ANM21**

1. When designing seed mixes for new prairie restoration plantings, refer to Construction Specifications 645, Upland Wildlife Habitat Management, or 550, Range Planting.
2. A minimum of five native perennial grasses and six native perennial forb species shall be used in new plantings.
3. Species mixes shall be designed using location guidelines and adapted species for the region where planting is scheduled.
4. Follow planting requirements as specified in Construction Specifications 645, Upland Wildlife Habitat Management, and 550, Range Planting.
