KANSAS BULLETIN NO. KS120-13-4

SUBJECT: ADS—Purchasing Ethanol 85 Percent Fuel

Purpose. To provide guidance on the purchase of alternative fuel

Expiration Date. September 30, 2014

Executive Order 13149 requires that alternative fuel (Ethanol 85 percent [E-85]) be used to the maximum extent possible when available locally, unless:

- It is not reasonably available because the alternative fuel cannot be obtained within a 15-minute drive or within five miles (one way).
- It is unreasonably expensive costing at least 15 percent more than gasoline on a gasoline gallon equivalent basis.

To locate current and newly established fueling stations that offer E-85 alternative fuel, go to <http://www.afdc.energy.gov/afdc/locator/stations/>.

Currently there are 32 fueling stations listed on the above Website. As of January 15, 2013, there was one station listed that does not carry E-85 fuel. See the attachment for the listing with the station that no longer carries E-85 fuel denoted. Place a copy of this bulletin and the E-85 fueling stations list in each vehicle that uses E-85 fuel.
