CONSTRUCTION SPECIFICATION  
INSTRUCTION FOR USE  
CS-I-OR-203 EXCAVATION, ROCK

---

203.1 APPLICABILITY

Construction Specification CS-OR-203 is applicable to all rock excavation. It may apply to the excavation of core trenches, emergency spillways, outlet channels, supply channels, ditches, pipe trenches, surface drains, and of other excavation where the material is defined as rock. This specification and Construction Specification CS-OR-202, Common Excavation are NRCS classifications for excavation.

203.2 MATERIAL SPECIFICATIONS

There are no material specifications complementary to Construction Specification CS-OR-203.

203.3 SPECIAL ITEMS TO BE INCLUDED IN THE ITEMS OF WORK SECTION

- a. Location, configuration and limits of excavation including borrow sites should be shown on the drawings.
- b. Specify the surface finish requirements.
- c. Boring or test pit logs pertinent to all areas to be excavated should be shown on the drawings, if subsurface information is available. Test logs shall include water table elevations and dates.
- d. The location and limits of areas where the material may be used should be shown on the drawings, if applicable.
- e. The location and limits of waste disposal areas should be shown on the drawings, if applicable.
- f. The location and limits of the utility right-of-way or easements should be shown on the drawings, if applicable.
- g. Specify special requirements for dewatering, if applicable.
- h. Specify special requirements for blasting, if applicable.
- i. Specify special requirements for control of erosion, sedimentation, water pollution and air pollution.

203.4 ITEMS OF WORK AND CONSTRUCTION DETAILS

Starting at the top of page 203–3, prepare and outline job specific "Items of Work and Construction Details" (IWCD) in accordance with these instructions.
