PLANT MATERIALS TECHNICAL NOTE NO. 22

PARTIAL LIST OF COMMERCIAL VENDORS FOR NATIVE SHRUBS, GRASSES, LEGUMES AND FORBS (EASTERN WASHINGTON AND EASTERN OREGON)

Scott M. Lambert
Plant Resource Specialist for Washington and Oregon
Pullman, Washington

The following partial list of plant and seed vendors is a supplement to Plant Materials Technical Note 9. The list is divided into two parts: Commercial Vendors for Native Shrubs and Commercial Vendors for Grasses, Legumes, and Forbs. This information may be used as a reference for the Conservation Reserve Program, and for other conservation seedings and plantings in eastern Washington and eastern Oregon.

We recommend using certified seed of approved cultivars because purity, germination, other crops, and weeds are included on the certified seed tag. Also, 0% state-listed noxious weed seeds are allowed in certified seed. Buying certified seed ensures the buyer of seed of known tested quality and cultivar. Percent germination of certified seed is tested within 18 months of sale. Pure-live-seed percentage is easily figured from the seed tag.

NOTE: Certified seed of conservation grasses, legumes and forbs may also be obtained from THE LOCAL FEED & GRAIN STORE, CENEX, OR WESTERN FARM SERVICE. Also consult "Hortus West - a native plant directory and journal" for additional information on seed and plant vendors.

PARTIAL LIST OF COMMERCIAL VENDORS FOR NATIVE SHRUBS
(Eastern Washington and Eastern Oregon)
