

TSS BREAKOUT SESSION

- **A table has been created of soils probable for WRP.**

This concept can be applied nationally.

**Would be created locally until it can be provided through
SDM/WSS.**

Can be augmented with LC/LU and CLU's.

Contact Steve Cambell

- ▣ **Non tech descriptions available and posted through SDM/WSS. RSS should generate now for FO's. Need to integrate into CDSI**

- ▣ May need to have index for each crop and create relative yield using the index for RUSLE2

- ▣ **Regional Resource Soil Scientists can generate Moist/temp regimes, etc. across MO's to facilitate updates.**

- ▣ **Recommended that FSA download CRP related soils data at the national level or at least at local FSA office (Finnell working with National FSA staff)**

- ▣ **Need SDV to be able to geospatial datasets**
- ▣ **Adjustment to Rapid Soil Carbon soil groups need to be provided to Larry West ASAP.**

- ▣ ***Recommended more regional based training to reduce state costs**
