

FY 2010 NH-NRCS WETLAND RESERVE PROGRAM GARCs

To estimate your GARC value:

Step 1: Determine your parcel size (<15 acres or >15 acres)

Step 2: Determine your town's community tier (see page 2)

Step 3: Determine your parcel's physical characteristics (see page 3)

Step 4: Multiply the Value/Acre (in red) with your parcel size. This is your estimated GARC.

Example: A 100 acre parcel in Derry (Community Tier III) with High Physical Characteristics would yield an estimated GARC of \$651,000 (\$6,510 x 100 acres).

COUNTY	WRP GARC			WRP GARC		
	PARCELS < 15 ACRES			PARCELS > 15 ACRES		
	Community Tier	Physical Characteristics	Value/Acre	Community Tier	Physical Characteristics	Value/Acre
Rockingham	I	Subdivision	\$15,543	I	Subdivision	\$9,207
		High	\$14,130		High	\$8,370
		Moderate	\$7,065		Moderate	\$4,185
		Limited	\$2,826		Limited	\$1,674
		Restricted	\$707		Restricted	\$419
	II	Subdivision	\$13,816	II	Subdivision	\$8,184
		High	\$12,560		High	\$7,440
		Moderate	\$6,280		Moderate	\$3,720
		Limited	\$2,512		Limited	\$1,488
		Restricted	\$628		Restricted	\$372
	III	Subdivision	\$12,089	III	Subdivision	\$7,161
		High	\$10,990		High	\$6,510
		Moderate	\$5,495		Moderate	\$3,255
		Limited	\$2,198		Limited	\$1,302
		Restricted	\$550		Restricted	\$326
	IV	Subdivision	\$10,362	IV	Subdivision	\$6,138
		High	\$9,420		High	\$5,580
		Moderate	\$4,710		Moderate	\$2,790
		Limited	\$1,884		Limited	\$1,116
		Restricted	\$471		Restricted	\$279

Rockingham Community Tiers

Tier I Communities (average residential values > \$300,000)

Tier II Communities (average residential values \$200,000-\$300,000)

Tier III Communities (average residential values \$100,000-\$200,000)

Tier IV Communities (average residential values < \$100,000)

<u>Tier I Communities</u>	<u>Tier II Communities</u>	<u>Tier III Communities</u>	<u>Tier IV Communities</u>
Atkinson	Candia	Derry	
Auburn	Danville	Epping	
Brentwood	Fremont	Exeter	
Chester	Hampstead	Newmarket	
Deerfield	Hampton	Portsmouth	
East Kingston	Kingston	Raymond	
Greenland	Londonderry		
Hampton Falls	Newton		
Kensington	Northwood		
New Castle	Plaistow		
Newfields	Salem		
Newington	Sandown		
North Hampton	Seabrook		
Nottingham			
Rye			
South Hampton			
Stratham			
Windham			

Parcel Physical Characteristics

I: Approved Subdivisions:

- 1) The parcel has a town-approved subdivision on record containing 3 or more subdivided lots.

II: Parcels with High Development Potential:

- 1) Greater than 35% of the soils are moderately well drained (or better) with average slopes of less than 20%, and the map unit areas and locations of these soils within the parcel facilitate a high potential for development (Example: Upland soils are located directly on town maintained road frontage).
- 2) The parcel contains adequate frontage on a Class V (or better) road, or is accessible by proven rights of way, and is free of any encumbrances, such that it is economically feasible and legal (meets the subdivision requirements of the given municipality) at this time for the parcel to be developed for commercial, industrial, or residential use.

III: Parcels with Moderate Development Potential:

- 1) Between 10% and 34% of the soils are moderately well drained (or better) with average slopes of less than 20%, and the map unit area and location of these soils within the parcel facilitates a moderate potential for development. Example: Parcel contains adequate road frontage but uplands are located in the back of the parcel and wetlands must be crossed to access them.
- 2) The parcel contains adequate frontage on a Class V (or better) road, or is accessible by proven rights of way, and is free of encumbrances, such that it is economically feasible and legal (meets the subdivision requirements of the given municipality) at this time for the parcel to be developed for commercial, industrial, or residential use.

IV: Parcels with Low Development Potential:

- 1) Less than 10% of the soils are moderately well drained (or better) with average slopes of less than 20%, and the map unit area and location of suitable soils within the parcel facilitates limited potential for development. Example: Parcel contains limited upland soils and significant restrictions such as wetlands, ledge, etc. must be overcome to access developable soils.
- 2) The parcel contains adequate frontage on a Class V (or better) road, or is accessible by proven rights of way, and is free of encumbrances, such that it is economically feasible and legal (meets the subdivision requirements of the given municipality) at this time for the parcel to be developed for commercial, industrial, or residential use.

V: Restricted Parcels:

- 1) None of the soils are moderately well drained (or better) with average slopes of less than 20%, and the map unit areas and locations within the parcel facilitate no potential for development (Example: Parcel contains some developable soils but they are inaccessible).
- 2) The parcel does not contain adequate frontage on a Class V (or better) road, is not accessible by proven rights of way, or is not free of encumbrances (Example: Deed language stipulates the land must be maintained as a wildlife refuge), such that it is not economically feasible and legal (does not meet the subdivision requirements of the given municipality) at this time for the parcel to be developed for commercial, industrial, or residential use.

VI: Special Consideration:

- 1) If a landowner has an eligible application to multiple NH-NRCS Easement Programs, the parcel may qualify under the highest physical characteristics category of the total acreage.
