

# **DELAWARE MATERIAL SPECIFICATION**

## **CONCRETE AGGREGATE MS 203**

### 1. **SCOPE**

This specification covers the quality of fine aggregate and coarse aggregate for use in the manufacture of portland cement concrete.

### 2. **QUALITY**

Aggregate shall conform to the durability and gradation requirements of ASTM Specification C-33.

### 3. **REACTIVITY WITH ALKALIES**

The potential reactivity of aggregates with the alkalis in cement shall be evaluated using the standards found.

Aggregates found to be potentially reactive shall not be used.

### 4. **STORING AND HANDLING**

Aggregate of each class and size shall be stored and handled by methods that prevent segregation of particle sizes or contamination by intermixing with other materials.
