

# **DELAWARE CONSTRUCTION SPECIFICATION**

## **TIMBER FABRICATION CS 57**

### 1. **SCOPE**

This specification covers the quality and installation of plywood and pressure treated or surface treated structural timber poles, posts, and lumber.

### 2. **MATERIALS**

Lumber or timber shall conform to the requirements of Delaware Material Specification 218, unless otherwise specified on the drawings. All lumber and timber shall be identified as set forth in the grading standard. Plywood shall be exterior quality.

### 3. **INSTALLATION**

The material shall be dimensioned, and installed at the location shown on the drawings.

### 4. **FASTENERS**

Fasteners shall be of the size and grade shown on the drawings. The fasteners shall also conform to the requirements of the local building code.

### 5. **PROTECTIVE COATINGS**

Lumber or timber in contact with the earth shall be protected by a preservative that conforms to Federal Specification TT-W-571, Wood Preservatives. Other lumber or timber shall be painted or treated with a preservative as specified on the drawings.
